## Current Comment

In the current issue of Liberty magazine there appears an article by Herman Bernstein under the caption, "Can We Abolish War?" It is not really an article at all, but a compilation of the opinions of prominent and reputedly brilliant men in this country and elsewhere.

After reading the opinions of these celebrated gentlemen their stature as mental giants has shrunk considerably in my estimation: in all but a few cases, that is.

Here are a few samples: Menckeen, to whom Bernstein refers as critic and idol-smasher and who, I must confess, never evoked in me the admiration which was his customary lot from young iconoclasts of the past decade, says, "Another war is inevitable. It seems hopeless to talk of peace." Austen Chamberlain: "I distrust the judgement of those who say they have a formula." (For peace.) Dean Inge, British churchman: "I do not know how wars can be prevented. I wish I did." Newton D. Baker, who was secretary of war in the United States during the World war: "I frankly have no formula, and know of none." Lion Feuchtwanger, German novelist, holds out more hope: "Control munitions industries, create a real international police." Lord Robert Cecil, statesman, hits the nail on the head: "Why cannot the world get peace? Chiefly because of nationalism."

Not a very reassuring group of opinions, is it? And not very good reccomendations for the master minds which evolved them. The German novelist offers constructive criticism when he advises the control of munitions manufacture and dstribution; but the only sane idea in the whole mess comes from what our good nationalists like to call "benighted Mexico." The following is the opinion of President Abelardo L. Rodriguez of Mexico:

"The peace of the world will be effected and will endure when all the elements of labor—workers and farmers—duly organized, will unite in taking the necessary steps to refuse to obey inhuman mandates."

The only ray of sunshine in the whole discussion comes from the peppery little republic to the south. Among the master minds of the world there seems only one capable of getting into high gear. And with an international farm-labor organization such as suggested by the Mexican president, war would indeed become impossible. Nationalism would go by the board, and the world powers could take time out to become acquainted and to become really civilized.

A world lost to war would be a grand place in which to live. The tremendous sums now spent on war could be used for educational purposes and for the more even distribution of the luxuries of life. Old age pensions would become possible the world over, and people would have a spot of time to sit back and enjoy life.

In substantiation of that opinion, allow me to present Denmark, Sweden, and Norway. No billions there are spent on war; educational standards are high, the tempo of life is even and not so rapid; people know how to live. No constant threat of war mars their happiness.

There is just one thing to do: follow the Mexican's advice. If we, the rank and file of the world's population who, in war time, become cannon-fodder, should absolutely refuse to be slaughtered in the interests of "nationalism," there couldn't be much of a war, could there?

This principle should be taught in the public schools of every land; it should be fostered openly by the churches, by the service clubs, and by the many women's organizations in America and abroad. Rob war of the glamour with which it is clothed in order to excite the youth of the world; show them what a bloody, useless, costly thing it is, and war would become an impossibility. And that's the major job of the present generation.

---

Special Armistice day sermons will be delivered at the Congregational church Sunday by the Rev. J. H. Bennett who, at 11 o'clock will speak on "Things That Make for Peace." At 7.45 his topic will be, "Things That Still Make for War."

## CAMPBELL COMMUNITY CHEST CAMPAIGN UNDERWAY TODAY

## GROUND BROKEN MOND'Y FOR NEW DAM AT VASONA

A large crowd of water conservation enthusiasts augmented the group of distinguished citizens who Monday afternoon "broke ground" on the site of the new $100,943 Vasona Junction percolation reservoir dam in Los Gatos creek about two miles north of that city.

While each speaker turned his shovel-full of earth, the rapidity with which the work will go forward was best demonstrated by a huge tractor which, pulling a tremendous "dirt mover," scaled a precipitous cut bank—and took the bank completely out with one cut.

District officials who attended the ceremony included President R. L. Parry, Secretary Leroy Anderson, Carl N. Swenson, contractor; Fred H. Tibbetts, engineer for the water conservation district, and S. D. Farrington, Ralph F. Simmons, William F. Noethig, directors, and Attorney Herbert C. Jones.

Fred Tibbetts spoke, recalling that he had learned to swim in the creek just below the dam site—"when there was plenty of water here. There will be plent of water again, he said , when the dam is completed.

Herbert Jones pointed out that the Vasona structure is the first to go up out of funds created by the recent bond issue and the PWA grant of $673,000. Alexander Jefford, resident PWA inspector of the project, assured the crowd that "President Roosevelt will indeed be pleased to hear of the start of this great work."

Carl Swenson, contractor, stated that local labor and local materials will be used whenever available, and Harry C. Smith, president of the Campbell chamber of commerce, spoke of his town's work in fostering the conservation program, its people's pleasure over the actual start of construction.

An unexpected visitor to the scene was Dr. Frank Adams, professor of irrigation institutions of the University of California. This distinguished guest was invited to address the crowd, and he spoke of his 40-year interest in water conservation in the valley.

"Everyone in the Campbell district will be visited within the next week or so in the interest of the Community Chest, and it is earnestly hoped that the response will be liberal enough so that we will have sufficient funds to properly carry on the work of the different agencies during the coming year." Such was the comment of Campbell Community Council members in commenting on the Community chest drive which started today.

While the Federal Government, the State and the County are all contributing to the general relief work, there are nevertheless certain demands that must be met by the communities themselves, and the cities and towns must carry their load. Campbell this year is working independently of the Santa Clara county chest, and such funds as have been budgeted will be spent here for the relief work, the library and boys and girls work.

William N. Lloyd, manager of this years' campaign, will have about 50 workers in this section beginning today, and he bespeaks for them your courteous reception and generous response. Let's put Campbell "over the top" as we have in past campaigns.

## Fire Chief Warns Against Chimney Fires

At a meeting of the Campbell volunteer fire department Monday night Chief Ed Genasci warned against chimney fires, which he said, can be prevented if the householder will excercise a bit of caution. "Chimneys that are kept clean," asserted Genasci, "seldom burn out. It is the dirty chimney that constitutes a fire hazard." He urged that chimneys be cleaned and examined before cold-weather fires are started up.

There arose at this meeting a question as to whether or not the Campbell volunteers should join the Santa Clara County Fireman's association. The advantages of membership were discussed, and the decision was left up to the board of fire commissioners.

---

The college group of local C. E. gathered at the Bennett home Hallowe'en for a party.

## American Trust Statement Shows Big Deposit Gain

A deposit gain of $21,000,000 in the past year, of which $5,000,000 was gained in the last three months, is shown by American Trust company's statement of condition as of Oct. 17. On that date, deposits were $211,291,000, as compared with $206,293,000 on June 30 and $189,844,000 on Oct. 25, 1933, the date of the corresponding call a year ago.

Reflecting more active business conditions, loans show a more than seasonal gain, having increased approximately $4,500,000 since June 30, although the current loan figure is lower than the loan total of a year ago.

## Campbell Student Talks On Poultry

Lawrence Buehner, student at Cambpbell high school, Saturday talked over KGO on the Future Farmer hour at noon. Lawrence is an agriculture student, taking courses from C. E. York and R. C. Fitzsimmons.

Last spring he won a first prize for the poultry project he entered in the south coastal region Future Farmers' contest, and this fall took a second place at the state fair.

---

Group 2 of the Congregational church guild will meet Thursday, Nov. 15, with Mrs. Henry Young for a 1 o'clock luncheon. This will be the last meeting of the group for the year.

## Ralph Hyde Wins Insurance Honors

Ralph H. Hyde, local insurance agent, has just received word from the Northern Life insurance company of Seattle, Wash., to the effect that he had the greatest production for the Month of October over several hundred agents representing the company in five west ern states.

This contest is held each year among the agents of this company, and the winner is awarded a special "write-up" in the company's monthly magazine, "Aurora Borealis," and with a suitable prize. Mr. Hyde has the distinction of having written 41 policies out of 70 calls made during the month, a record seldom equalled.

"Not only is Mr. Hyde's accomplishment an honor to him, but it enabled the San Jose agency to lead all other agencies for the month of October," said Harry Paulbach, district manager for Northern Life.

## Get Your Play Tickets Early

Tickets for the 1934 high school senior class play have been on sale for the past week, and the best seats are being rapidly reserved. Those intending to see the offering, "Captain Applejack," are urged to arrange for seats as soon as possible. If you have not been solicited by a member of the senior class, a phone call to Campbell 14W will bring a salesman to your door.

## Campbell Voters Give Merriam Small Majority

## A. VAN ARSDALE LOCAL RANCHER BURIED MOND'Y

Since 1884 Andrew D. Van Arsdale was a resident of this community. On Thursday he passed away at his ranch home on Williams road, and on Saturday was laid at rest in Santa Clara cemetery after services at the family home.

Last rites were conducted by the Rev. William H. Lloyd of the Sunnyvale Methodist church. Music was provided by Mrs. Ethel Davis and Mrs. John D. Blaine, who sang, accompanied by Mrs. D. H. Cramer. Pall bearers were Carl Steward, Jack Boden, Ted Boden, Louis Carrol, Robert Beuring and Earl Stewart.

Mr. Van Arsdale came to this country from Kentucky. He worked for several years on ranches in this district, and for the past 40 years operated his own property on Williams road.

Identified with the Campbell Methodist church for years, and later with the Centella church in San Jose, Mr. Van Arsdale was a devout and quiet man, finding much comparionship and recreation in church affairs.

He was married in 1884 to Miss Annie J. Hall, who survives him, together with their children, Mrs. W. A. Madden of Santa Clara, Mrs. J. M. Harrington of Culver City, Mrs. Claud V. Townsend of San Jose, Mrs. A. Folsom Hayes of Salem, Oregon, Mrs. Fred J. Baggott and Dwight W. Van Arsdale of San Jose.

## 100-Acre Ranch Sale Recorded

A real estate transaction of the past weeek transferred 100 acres of orchard land from Mrs. J. L. Pendleton to Grace M. Ferguson. The sum of $9,000 was the consideration for the transfer of this San Tomas property, according to documents filed by the San Jose Abstract & Title insurance company.

That Campbell people are not entirely sold on the Republican administration in California is evidenced by the complete returns from the three local precincts which give Merriam but 25 votes more than they accorded Upton Sinclair. Merriam, 422; Sinclair, 397.

The balance of the state ballot ran about as was to be expected, with the exception of lieutenant governor, in which race Hatfield was favored by only 18 ballots over Downey, Sinclair's team-mate.

County offices races were not very close here in most instances, with the exception of the Emig-Lyle contest. Emig led Lyle in Campbell by only three votes, and at press time today it was understood that Emig had conceded the county to Lyle. Other county losers are expected to be about as the Campbell vote indicates with the possible exception of Dale Holland who, while enjoying a lead of 149 votes over Jerry O'Brien in Campbell, was not doing so well in the county later today, according to reports.

An interesting sidelight on Tuesdays ballotting is provided by the number of Communist votes, which, while small, is greater here than it has ever been before.

Following is a tabulation of the votes cast in Campbell precincts with the exception of several write-ins which were accorded only one vote:

| | |
|---|---|
| **STATE** | |
| **COVERNOR** | |
| Sam Darcy, Com. | 6 |
| Milen C. Dempster, Soc. | 0 |
| Raymond L. Haight, Prog. | 79 |

| **CORONER** | |
| Amos O. Williams | 358 |
| C. C. Spalding | 403 |

Among the many propositions voted on Tuesday, perhaps two of the most interesting to people in this community are 21 and 24. No. 21, Eminent Domain, carried 389 to 144, and No. 24, county hospital bonds, carried 434 to 267.

---

On Friday evening Mrs. John Fortini and son gave a surprise party in honor of Mr. Fortini's birthday. Guests who enjoyed the evening included Mr. and Mrs. Ferioli and their two sons, Mr. and Mrs. L. Fortnin, D. Fortini, Mr. and Mrs. Handerson, Mr. and Mrs. Bonger and their two daughters, Mr. and Mrs. Gordon, Mr. and Mrs. Hendricks and Mr. Cox of Campbell.

## News of the Week

From Chislers' Gulch, the gambler's paradise, to the aeriel exhibit at Gilmore Flying Field, Grass Valley's Gold Quartz Discovery celebration was announced a success. This was the city's fourth annual celebration of the discovery of quartz near the town in 1850. Many famed characters of the gold days were on hand to anecdote for the benefit of visitors.

In the Hawaii, a 24-foot schooner, three youths, the oldest 24, sailed out of San Pedro harbor bound for Honolulu. The tiny craft has no motor and will depend entirely on sail. Neither has it a radio receiver. Frank Anderson, 22-year-old owner of the boat, said they hoped to reach the islands in three weeks a crowflight distance of 2300 miles, but much longer by sail.

"Hear ye! Hear ye! The Superior Court of Yolo County is now in session." With these words genial Sheriff J. M. Monroe opened the murder trial of Judson C. Doke, accused of shooting Lamar Hollingshead, asserted lover of Doke's wife. Doke has pleaded not guilty because of insanity. As the trial opened it became apparent that the "unwritten law" will become an important issue.

Growing popularity of the Townsend Plan was demonstrated when 10,000 San Diego Townsend Club members held a mass meeting to hear Ed Sample, former state senator and a Townsend backer, discuss merits of the plan. The meeting was called by Dr. F. E. Townsend, founder-president of the organization, who asked that club members throughout the nation assemble simultaneously.

After two American-built passenger planes finished second and third in the London to Melbourne race, beaten only by a racing ship from England, European aviation is looking westward. Three high officials in the French air service planed to Los Angeles to visit the Douglas, Lockheed, Vultee and Northrop factories.

Train crew and hoboes luckily escaped injury when the locomotive and 13 cars of the freight train on which they were riding jumped the track near San Leandro. A switch-lock had been smashed so as to derail a train. The Scenic Limited passenger train was scheduled to pass over the switch only four hours after the freight was derailed. Only two days before a switch was found smashed at Niles just in time to prevent a wreck.

"Six months in jail or leave the state," was the sentence of the Municipal Judge Brand of Los Angeles to 50 itinerants. The judge sentenced them all to 180 days, suspending the last 179 provided they leave the state 12 hours after their release from one day in jail. Postcards were supplied the box-car tourists to mail the judge from another state. Failure to do this made the tramps liable to capture to serve out their 179 day jail term.

A device designed to stop an automobile when it strikes something has been patented by Walter M. Smith of El Cajon. When the device, an extra bumper, strikes an object, the brakes are automatically set, the ignition is shut off and the gas feed is cut.

A $50,000 blast shook East Oakland when accumulated gas exploded and wrecked eight buildings. Eleven people were injured by the accident which was caused by a leaking gas pipe. Concussion from the explosion was felt over a radius of six blocks.

Dr. Arthur H. Briggs, 73, for 13 years head of the California Anti-Saloon League, has been found dead at his Redondo Beach home. A heart attack is said to have caused the death. For many years Briggs has been a militant opponent of liquor in this state.

The $22,000 back wage demands of 84 workmen who helped build the Fort Miley Veterans' Hospital at San Francisco have caused a ruling to be made which will be national in scope, according to Joseph J. Creem, California labor commissioner. Secretary of Labor Frances Perkins made the ruling that there is no difference between a laborer and a common laborer. Workmen are entitled to the wage scale applicable to the tools used and work done. The ruling is the result of Creem's asking the labor secretary's opinion on the $22,000 wage demands.

**Nine Californians were lucky enough to win $2,000 prizes in the famous Irish Sweepstakes this year. Altogether 17 Californians won prizes.**

**California Chamber of Commerce says that state employment is only 12 per cent under 1929, at the same time being 16 per cent more than 1932. Employment in the consumption goods industries equals 1929, while figures for the canning, meat packing, paper and chemical industries exceed those of that year.**

## HISTORICAL CALIFORNIA

PRESIDIO BUILDING RECALLS ILL-FATED ROMANCE

The modern Spanish structure shown above was originally built in 1776. Although SERA workers have renovized it, no attempt was made to do much more than restore the historic adobe building, which has housed Spanish, Mexican and American commandants of the Presidio at San Francisco.

While many historic military gatherings have been held in the building which is now being used as an officers' clubhouse, it is most famous for the ill-starred love affair of Dona Concepcion and Captain Resanov which started there.

In 1806 a Russian vessel dropped anchor at San Francisco. Among the officers aboard was Captain Resanov. That evening the Commandant of the Presidio gave a reception for the Russians at his house. It was here that his daughter and Captain Resanov met and fell in love. They plighted their troth and Resanov left for Russia to ask the czar permission to marry the Dona. Resanov never returned.

His lover waited in vain, finally entering a convent where, 40 years later, she heard that her captain had died on the icy Siberian plains en route to the czar with his request.

# Sports

Two gridiron thunder storms will deluge California fans with thrills on the weekend of November 10. The spot where spectators are apt to be most drenched is the Stanford Stadium at Palo Alto. In that sacred football shrine a contest will be staged between the undefeated Indians and a rough and ready gang from the north woods, the Washington Huskies. The Huskies are not only undefeated but also untied.

This friendly little contest is nothing more than an unofficial battle for the Pacific Coast Conference championship—and the honor of playing in the famous Pasadena Rose Bowl on New Year's day. Both teams are out to win.

So far the Huskies have used an attack which may prove Stanford's downfall. In the first game of the year the Indians were tied by Santa Clara, 7 to 7, because the Bronco backs knew how to pass and the Bronc ends had sticky fingers. The Husky aerial attack is even more dangerous than that of the Broncs. While against the Trojans the Indians showed that they had mastered air defense by intercepting two passes, knocking down five and allowing the Trojans only one completed, the Huskies do not wait until the last desperate five minutes to start slinging.

In speed and power, the Washington backfield is nearly equal to the Indians. Although not candidates for all-Coast or all-American honors, big Burl Bufkin, Socko Sulkosky and Art Ahonen are three scoring threats in any company. As for the line, Stanford has the advantage with such stalwarts as Wes Muller and that remarkable end, Monk Moscrip and five other young gentlemen who form the Coast's most effective battering ram. The Husky line is considered light with such small boys as 205-pound Charles Bond, the tackle with the educated toe.

Despite the Huskies' clean record, it looks as if they will become another victim of the Red Terror of the Coast. Their showing against California and Oregon States was impressive, but Stanford's showing this season has been little short of phenomenal.

In the Los Angeles Coliseum a second grid storm is to be held. The most juggled team on the Coast, the now thoroughly under-dog Trojans, will endeavor to atone for three stunning defeats by overthrowing the powerful Bears from Berkeley. After having their championship hopes smashed by the Huskies in a close game two weeks ago, and after their tough non-conference battle with Santa Clara, the Bears are in no mood to help the Trojans patch up their shattered honor. Selfishly, the Bears will go into the game to bring themselves another much-needed victory and to smash the Trojan horse to kindling wood.

As to scoring power, the Berkeleyites have shown themselves much superior to Troy. If anything, the Trojan backfield is better than the Bears' but the line is woefully weak. This is the reason Troy lacks the scoring punch. Further shifts in this department last week by Juggler Jones may have helped, but so far, untimely shifting have only served to confuse the boys. With a week layoff giving them time to get acquainted with their new positions, the squad should show up better this coming Saturday.

Southern California's seeress, who is rarely wrong in her predictions, foretells a Trojan victory. U. S. C. fans hope Miss Gene Dennis is right. A couple of weeks ago she predicted that the Trojans would lose and that a new star would loom on the Trojan horizon. Troy lost and found its new star, Davie Davis. Rumors from the North, though, say the Bears are not superstitious.

# News Oddities

Lodi—Attracted by feeble honks, early morning motorists lifted the overturned car of Clarence Stinson, 22, and extricated him from a nine-hour imprisonment beneath his auto. Swerving to avoid a truck, his machine turned over, pinning Stinson's arm so that all he could do was sound the horn.

Los Angeles—The Los Angeles Bar Association and the Lawyer's Club are investigating the strange romance of Judge Guy F. Bush, who, it has been discovered, has just married the former wife of a man he sent to jail.

Santa Cruz—Another birth record has been established—17 offspring. The mother is Ricas Trude, German police dog, who in six years has given birth to 79 pups.

Oakland—Unable to find his clothes and wanting to take a walk, Bert Alford just daubed himself with an oleaginous treacle. When a night watchman first saw him he thought he was dressed for a Halloween party. Police soon discovered Alford was just a little "oiled," inside and out, and helped him penetrate his disguise with soap and benzine.

Gerber—Spring is here, according to a field of California poppies which suddenly began blooming. Many apple trees are blossoming and bearing fruit, and numberless spring flowers are blooming. Unusual weather is given as the cause.

# California Names
## Their History & Meaning

By THOMAS P. BROWN

LA JOLLA (San Diego County)—La **Ho**-yah . . . Meaning disputed: (1) from hoya, a pool surrounded by hills; (2) from joya (**hoh**-yah) jewel; (3) of Indian derivation.

LA PANZA (San Luis Obispo County)—Lah **Pahn**-zah . . . The paunch. At this point hunters used the paunch of a beef to bait a bear-trap.

LASSEN (County)—**Lass**-en . . . (Pioneers pronounced it "Lawsen.") For Peter Lassen, who blazed "Lassen Trail" and who was one of Gen. John C. Fremont's guides.

LOBITOS (San Mateo County)—Loh-**bee**-toce . . . Little seals or sea lions. Lobitos is the dimunitive of lobos (Loh-boce) which means wolves, seals or sea-lions.

LODI (San Joaquin County)—**Low**-die . . . Lodi, Italy, a town on the Adda River, near Milan in Lombardy, was the scene of a dramatic victory by Napoleon over the Austrians in 1796.

LOS ANGELES (County)—Loce **Ahn**-hay-lace . . . The angels. Its full name, originally was "El Pueblo do Nuestra Senora de la Reina de los Angeles de la Porciuncula . . . the town of Our Lady the Queen of the Angels of Porciuncula. Porciuncula, meaning little portion, was the abode of St. Francis de Assisi.

LOS BANOS (Merced County)—Loce **Bahn**-yoce . . . The baths; a bathing place. Derived from the fact that the pools of the creek were used by the pioneers for bathing.

(To be continued)

# STATEWIDE
## Farm & Ranch News

After a marked rise from May to September, the general level of farm prices has declined slightly, according to State Director of Agriculture A. A. Brock. Cotton, grain, potato, and most livestock prices are lower than a month ago. The general level of wholesale prices in the United States increased during the past year from 104 per cent of the 1910-1914 average in October 1933, to about 112 per cent in early October of this year. Price rises in farm products and foods are said to account for this advance in wholesale prices, since non-agriculture products have remained almost stationary. Thus the ratio of farm product prices to non-farm products has been markedly increased, especially since the beginning of this year.

Sixty feet north of the Mexican boundary line and paralleling it is the 60-foot wide and 12-foot deep All-American canal. Not only will this project benefit Imperial Valley farmers in the future with abundant water supply, the canal is already helping many distressed farmers by giving them employment in canal construction. A million dollars of Federal money will be divided among farmer-workers.

Walnuts dropped on public highways from trees growing on private property belong to the tree-owner. A Woodland court gave this decision after two men, arrested for picking up nuts on the highway, had held that such walnuts were public property.

Word comes from the national capital that California farm labor is the best paid of any in the United States. California farmers are paying workers an average of $37 a month with board. This figure is tied by Rhode Island and exceeded by none. National average is $18.63. Pay by the month without board in this state was $58 and the national sum was $27.83. These figures are for October first.

George S. Templeton, head of Fontana's Federal rabbit experimental station, visited Sacramento County to discuss local rabbit problems with County Agent E. L. Stanley. He also talked with several leading rabbit raisers in the vicinity. Marketing and mortality were the most discussed questions.

Raisin Control Board members met at Fresno to consider initial offering of 15 per cent of control percentage raisins to commercial packers. The board has in excess of 13,500 tons as control percentage goods representing 15 per cent of growers' deliveries, temporarily withheld as market stabilizer.

Complaints that medium sized eggs are being sold in California as large eggs have caused orders to be issued to all county sealers of weights and measures to check scales used in weighing eggs. State regulations require large eggs to weigh 23 and a half ounces a dozen and medium eggs to weigh 20 ounces a dozen.

In one section of California crops are behind schedule. Under normal conditions tomatoes in the Nilan district are harvested weeks before those in any other section of the Imperial Valley. Crops here have not as yet matured and preparations are being made to cover the plants with shelters to prevent frost damage. The crop is expected to be as heavy as in 1933.

Recently 70 bales of "soft, raw fly cotton" arrived at a California port from China. Division of weights and measures officials investigated, finding the cotton to be second-hand stuff salvaged from cast-off padded clothing of the Chinese. J. S. Casey, chief of the division, halted all sale of the "soft, raw fly cotton."

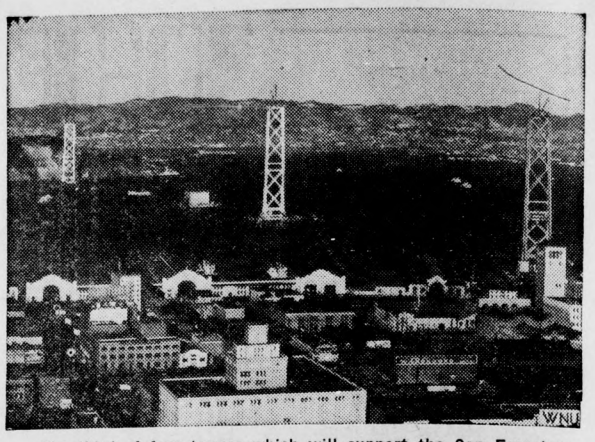
L. J. Buckel of El Centro owns the first, second and third place cows for butter-fat production in Imperial Valley, the farm testing bureau reports. The winning cow produced 71 and a tenth pounds for the month of September

Capacity of J. C. Hornall's warehouse at Arbuckle has been increased by 50,000 bags, giving it a total capacity of 280,000 bags of grain. This enlargement was made necessary because of increased grain yields in the district. On some ranches rice is running 60 to 65 bags an acre; other grains are running 30 bags an acre, a large increase over recent seasons.

**Allotted $6,000 for the purpose, Lassen County has already started purchasing cattle under the drought relief program. Modoc County, with an allotment of $9,000, has also begun to buy.**

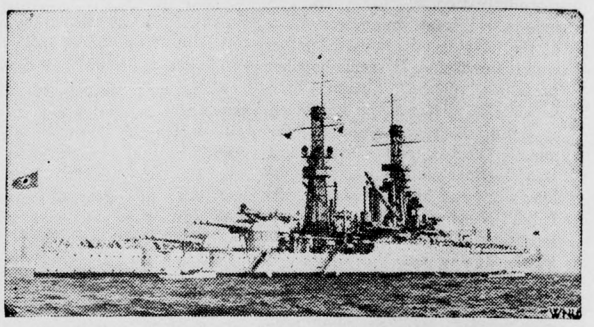
**The 12,000 ton harvest of the largest vineyard in the world has been picked. The 5,000 acres belong to the Italian Vineyard Company near Guasti. In this district 60,000 tons of grapes have been picked, the army of pickers having already left for new fields to conquer.**

## THREE UP AND ONE TO GO



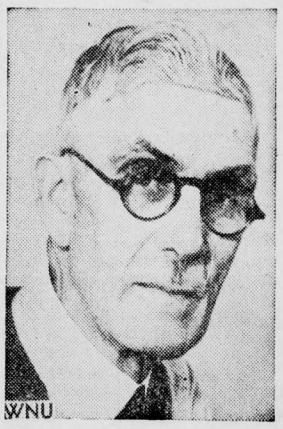
The third of four towers which will support the San Francisco-Yerba Buena Island section of the world's largest bridge was raised into place recently. This copyrighted Associated Oil Company photo shows how the 10,000-foot long structure will tower over San Francisco Bay. No matter how tall the masts, any sailing vessel in the world can pass beneath the span because of the bridge's 223 foot clearance. The two center towers are 505 feet high, and the two nearer land rise 460 feet.

## HOME AGAIN AFTER MANEUVERS



The U. S. S. New Mexico, Pacific Fleet flagship, which leads an armada of some 80 battleships with their auxiliaries back to home waters in California. Arriving November 9 after sham battles up the Pacific Coast from the Panama Canal, the Fleet will meet the huge U. S. S. Pennsylvania, which has been waiting for them at San Francisco. Ports touched by Uncle Sam's first line of defense plan a belated Navy Day in honor of the arrival.

## PENSIONIST



Dr. F. E. Townsend, retired Long Beach physician, whose old age pension plan has aroused nation-wide interest. Clubs sponsoring the plan, which would give $200 a month to every citizen past 60, have been formed throughout the United States. Recently hundreds of these clubs from the Pacific to the Atlantic oceans met simultaneously to urge national adoption of the idea.

## DEATH ENDED LOVE

California authorities, piecing together details of the fatal shooting of Lamar Hollingshead, University of California student-poet, blamed the love he bore for Mrs. J. C. Doke (shown in the photo above), wife of a San Leandro official. Hollingshead's slayer, police said, was J. C. Doke, who was enraged over love letters the boy assertedly wrote to Mrs. Doke.

### CIRCUS COMES HOME AFTER TOURING U. S. AND CANADA

Baldwin Park—(WNU)—Completing a seven months tour of the United States and Canada, the Al G. Barnes Circus finally arrived at its winter home in Baldwin Park. Circus officials reported business better than at any time during the past four years, with good crowds attending everywhere on their 20,082 mile trip. The circus traveled as far east as Nova Scotia after leaving its winter quarters during the early part of last March. Its last performance was at El Centro.

Bovine tuberculosis eradication under the Jones-Connally appropriation is progressing rapidly in California, reports Dr. C. U. Duckworth, state animal husbandry chief.

## GETS $50,000

Photo shows Mrs. Emma M. Atherton, who according to press dispatches won the Cambridgeshire Handicap at Newmarket in England with a prize of $50,000. Mrs. Atherton lives in Buena Park, California. Mrs. Atherton said that she had turned down an offer of $7100 to sell the ticket.

## ALL-AMERICAN?

Photo shows one very good reason why Stanford is the most powerful team on the Pacific Coast this year. Although out of the game with injuries the early part of the season, Wes Muller, center, has played so consistently since his return to the Indian squad that he will be seriously considered for All-American honors.

### FORTY-DAY SEASON OPENS AT NEW PENINSULA TRACK

San Mateo—(WNU)—Ushered in by eight fast races, including the $1500 Stockton handicap, the open-day day of Bay Meadows, northern California's speedy new race track, was pronounced a success. Between 15,000 and 20,000 fans attended, betting $120,000, an unusually large gross for an opening day. Races will be held daily except Sunday for the next 40 days.

Beverly Hills—Crooks had better look out when they meet 35 husky policemen here. The officers have just received awards of proficiency in jui-jitsu from Captain L. McLaglen, world champion in the art, who has been training them.

# THE STORY OF JENNIE

1—Jennie's folks were musical.

2—Her father came of a long line of bass drummers.

3—Her mother played the brass horn.

4—They decided to give Jennie a musical education whether she liked it or not.

5—They chose to make her a harpist, Jennie being too young to resist.

6—Jennie's first major recollection was seeing a harp for the first time and thinking it was the front of an animal cage.

7—She developed a fear complex through spending her entire childhood fearing that the harp would fall on her.

8—But her parents never let up and Jennie became the child wonder of the community.

9—Everywhere that Jennie went her harp was sure to go.

10—That was the tough part of it.

11—But it meant that Jennie never got into any informal, jazzy parties.

12—One day Jennie disappeared from home, leaving her harp behind.

13—Nothing was heard of her for some years.

14—Then it was found she had eloped with a young man who had been an assistant keeper in the hippopotamus house at the zoo.

15—They had lots in common.

16—When located, Jennie had become a harmonica devotee. Her husband made a living carving ornaments out of acorns. They put in the long winter evenings together writing the Declaration of Independence on the head of a pin.

17—They had one son, Emil, a dwarf, who became a student of the atom.

MORAL—Let the kids develop their own way.

# Soon Will Be Able to Forecast Insect Visits

While entomologists have been informing interested persons these many years of the threatened abundance of destructive insect pests as the occasion required, along with degree of intensity and width of distribution, the announcement that the Illinois State Natural History survey has developed "insect forecasting" in a serious way is not without interest and value. For the survey is not only perfecting its forecasting abilities through long and increasing familiarity with insects and their habits, but it is enlarging its knowledge of control methods and it is receiving heartier co-operations in control from farmers and fruit growers. So there is higher purpose in "insect forecasting" that deals with the rise and fall of destructive pests.

Last year an outbreak of chinch bugs in Illinois exceeded anything of this nature in the last sixty-five years. As something was known in advance of its probable intensity and of its geographical distribution, the information brought Illinois farmers to arms and the state and individuals co-operated in the installation of something like 2,000 miles of barriers and the use of insecticides to hold and destroy the insects. In that way many thousands of bushels of corn were saved from destruction. Without the advance knowledge and the "insect forecasts" that were issued as a result of the knowledge the damage would have been much greater and over a greater territory.

Now the Natural History survey forecasts a recurrence of the scourge, unless weather conditions radically alter earlier prospects. So a forecast again arms the farmers and others who wage war on destructive pests, and the survey is ready to lead the fray employing the best of last year's control methods and urging use of seed corn types known to be resistant.

"Insect forecasting," however, is in no way confined to the chinch bug and his damaging course. There are dozens and even hundreds of other crop and fruit hazards in insect life, all of them known to and their life cycles charted by entomologists everywhere, who have advance knowledge of their coming and often a very accurate knowledge of the prospective intensity of their visits. Certain tribes come by rote and on scheduled visits, others come in intensity and on occasions known to specialists in their lore; certain weather conditions may hasten or delay, may stimulate numbers or may decrease the hordes. So the forecasts of the entomologists are useful and their direction of the fight in control is invaluable.—St. Louis Globe-Democrat.

# "Calf Love" No Laughing Matter

Harold P. Page, director of Y. M. C. A. boys' work, has proved himself a sage. In an article appearing in the The Parents' Magazine he warns mothers and fathers that they need not hope to escape contact with "Calf Love." They may deplore it, they may ignore it, they may try to laugh it off, but just so long as boys will be boys and there are girls in the offing, just so long there will continue to take place this phenomena of adolescent life to which the scornfully good-humored term is applied. In the opinion of this close observer of youth in his charge, this form of love is a beautiful, often wondrously moving drama, when put on by two clean-minded normal young people.

"Acknowledge its presence within the family circle," pleads Mr. Page, "greet it with dignity, with assurance, with sympathetic understanding.

"The boy and girl in love are in the grip of a cyclonic force. If you are wise you will make no attempt to play the superman or superwoman at this time," warns the director and astutely sets forth several common methods of parental attack which he believes are certain to miss fire.

"To deny the existence of 'calf love' by donning a mask of cold reserve smacks of cowardice," he flatly declares. "It only successfully erects a false barrier between parent and child that the latter will silently resent and as silently question its presence.

"Any challenge to reason is futile, because reason plays an insignificant part in 'calf love,' if indeed it is present at all. Pure feeling has taken its place.

"Ridicule is a cruel way of meeting the situation. It inflicts wounds which hardly, if ever heal, and may result in an utterly false appraisal by the young person of the intrinsic beauty of his love that may forever mar his relations with members of the other sex.

"A furtive approach will madden the young lover who considers a natural and intimate matter the object of a hidden attack.

"Force is futile and fatal during the flowering of a fragile emotion."

With keen comprehension of the peculiar need of youth during this period when a comparatively simple existence has suddenly been infinitely complicated, Mr. Page urges the substitution of tenderness for parental authority, and urges fathers and mothers to remember their own adolescence and the physiological causes and changes involved.

"Be frank with your boys and girls. Help them to grow up emotionally. Put a good book on sex into their hands. Above all, open your homes for good times and entertainments and see that the two young persons involved are together—for together they'll be—under your roof."

Sane advice, if you ask us. Mr. Page speaks with the knowledge gained by years of contact with other parents and sons as well as with the wisdom born of intimacy with two boys of his own with whom he must some day squarely face the problems of "calf love."

# Longevity Secret Now Held to Be Moderation

Ten thousand Japanese more than eighty years old recently told how they live, and their stories agree with the general direction surveyed for the several, still dimly understood, scientific roads to longevity.

These roads are diet, heredity, rest and mental poise. All seem to be converging toward the common goal of moderation.

On the diet there are two recent significant surveys indicating how man may soon learn to prolong his life. The latest, by Dr. C. M. McCay, of the Cornell university animal nutrition laboratory, challenged the present practice of feeding both animals and children enough to produce maximum size in the shortest time.

In his colony of rats Doctor McCay has some already twice normal rat ages, and still going, with the oldest equal to 110 years of human life.

The lives of these animals were doubled by just one thing—feeding them less than enough to let them grow as fast as nature would permit.

The other survey shows diet applied in a manner more nearly fitting humans' desires. This was made by Dr. Henry C. Sherman, of Columbia university, whose experiments led him to predict that the average life span can be prolonged ten years in the near future by choice of diet.

No nation yet has ventured to apply the known laws of heredity that result in longer life. But the Japanese study suggests this type of heredity is somehow mingled with moderation; that those who inherit their longevity come from families neither very small nor extra large, according to the Associated Press.

This study was made by Doctor Nakayama, a school hygienist. To him the 10,000 reported on climate, circumstances and manner of living, hygiene, tastes and family records.

Living in cities, a tabulation of the 10,000 reports shows, decreases the life span. Aged women are more numerous than aged men. Seaside villages were the most numerous among the habitats of the long-lived Japanese. All villages exceeded all towns for long-lived inhabitants and the towns were ahead of the cities.

The majority of those who reported were agricultural workers. Most were of medium build, but some were corpulent and a few slender. They now go to bed early and rise late. They generally have led quiet lives.

## MARVELOUS DWARF TREES

Only the Japanese cultivate the unique art of growing dwarfed trees in pots for room decoration. Sometimes these little trees, even after hundreds of years, are less than two feet in height, yet their proportions of stem, branch, and leaf are preserved with fidelity. Pots containing groups of six or eight fine ones, suggesting a forest, have frequently been sold for thousands of dollars.—Exchange.

## Why Children Need a Liquid Laxative

The temporary relief children get from unwise dosing with harsh cathartics may cause bowel strain, and even set-up irritation in the kidneys. A properly prepared liquid laxative brings a more natural movement. There is no discomfort at the time and no weakness after. You don't have to give the child "a double dose" a day or two later.

Can constipation be safely relieved in children? "Yes!" say medical men. "Yes!" say many mothers who have followed this sensible medical advice: 1. Select a good liquid laxative. 2. Give the dose you find suited to the system. 3. Gradually reduce the dose, if repeated, until the bowels are moving naturally without aid.

An approved liquid laxative (one that is widely used for children) is Dr. Caldwell's Syrup Pepsin. The mild laxative action of this excellent preparation is the best form of help for children — and grown-ups, too. The dose can be regulated for any age or need.

Your druggist sells Dr. Caldwell's Syrup Pepsin.

## DRASTIC PRICE CUT ON GENUINE BAYER ASPIRIN!

POCKET TINS OF 12 NOW 15c PAY NO MORE

ON SALE AT NEW LOW PRICES AT ALL DRUG STORES

### NOW—Pay *Less* and Get Real BAYER Aspirin!

If you're one of the people who has been denying yourself the speedy action and quick relief of BAYER ASPIRIN, in order to save a few cents, here's Good News for you:

We've reduced the prices on all sizes of Genuine Bayer Aspirin to a point that makes it unnecessary to ever again accept an unknown brand in place of the real BAYER article.

People by the millions, as you know, have long been willing to pay a higher price in order to enjoy Bayer's remarkably fast action in relieving headaches; neuralgia, and pains of rheumatism or neuritis. Now—you can enjoy its benefits without thought of price.

***Only* 15c *Now for* 12 25c *For Two Full Dozen***

Remember this next time you go to buy aspirin. You now actually pay *less* and get Genuine Bayer Aspirin. So never ask for it by the name "aspirin" alone; but always say "BAYER ASPIRIN" when you buy and see that you get it.

On sale now at new low prices—including the 100 tablet bottles, which have again been lowered in price—at all drug stores throughout the United States.

ALWAYS SAY "BAYER ASPIRIN" NOW WHEN YOU BUY

## Mercolized Wax

**Keeps Skin Young**

Absorb blemishes and discolorations using Mercolized Wax daily as directed. Invisible particles of aged skin are freed and all defects such as blackheads, tan, freckles and large pores disappear. Skin is then beautifully clear, velvety and so soft—face looks years younger. Mercolized Wax brings out your hidden beauty. At all leading druggists.

**Powdered Saxolite**

Reduces wrinkles and other age-signs. Simply dissolve one ounce Saxolite in half-pint witch hazel and use daily as face lotion.

## FEEL TIRED, ACHY—"ALL WORN OUT?"

### Get Rid of Poisons That Make You Ill

IS a constant backache keeping you miserable? Do you suffer burning, scanty or too frequent urination; attacks of dizziness, rheumatic pains, swollen feet and ankles? Do you feel tired, nervous—all unstrung?

Then give some thought to your kidneys. Be sure they function properly, for functional kidney disorder permits poisons to stay in the blood and upset the whole system.

Use *Doan's Pills*. *Doan's* are for the kidneys only. They help the kidneys cleanse the blood of health-destroying poisonous waste. *Doan's Pills* are used and recommended the world over. Get them from any druggist.

**DOAN'S PILLS**

"LIFE begins at 40" if you keep fit internally. The intestines, at middle age usually work more slowly than in early youth. When Nature slows up. When Nature slows up. CLEANSE INTERNALLY with Garfield Tea—a mild quick-acting, pleasant-to-take laxative drink.

FREE SAMPLE! Write to: GARFIELD TEA CO. Dept. 9 Brooklyn, N. Y.

**GARFIELD TEA**

At Drug Stores—25c and 10c

## Quick Healing FOR Skin Irritations

If you suffer with pimples, eczema, rashes, chafings, eruptions or other distressing skin trouble, begin today to use **Cuticura Soap** and **Ointment.** Bathe the affected parts with the Soap, anoint with the Ointment. Relief comes at once and healing soon follows.

Soap 25c. Ointment 25c and 50c. Sample each free.

Address: "Cuticura," Dept. 18S, Malden, Mass.

## The FARMERS CORNER

by RALPH H. TAYLOR

Executive Secretary Agricultural Council of California

California's state gasoline tax, which has been the storm-center of bitter and protracted battles in by-gone sessions of the state legislature, promises to stir up another battle-royal during the 1935 meeting of the law-makers.

**At least three proposals for** changes in the tax and in the system of allocating its revenues are certain to m ake their appearance in the legislature, according to present indications. And each of the suggested changes will generate days of heated controversy, if the legislators run true to form.

Here are the three amendments which are under consideration by various groups for submission to the legislature:

1. Diversion of part of the gasoline tax revenues from highway purposes to the general fund to help meet the state deficit.

2. Increase of the present 3-cent tax to 4 cents, with the additional income being allocated to general revenue purposes. There have also been some suggestions that the tax might be increased to 5 cents.

3. Allocation to California cities of 1-2 cent of the present 3-cent levy to build and maintain city streets without special assessments.

---

The proposal to divert gas tax revenues to the general fund is not new. It was submitted to the voters less than two years ago, with a stipulation that the money was to be used to pay for the interest and redemption of highway bonds, but was decisively rejected.

Since that time, however, the state deficit has doubled and trebled, with every indication that the forthcoming legislature will be forced to find more than $100,000,000 in new revenues. And the pressure for diversion of gasoline tax revenues to cover some part of the present general fund shortage has greatly intensified.

The terrific deficit confronting the state is also responsible for the proposal to increase the gasoline levy to four cents or more, with the additional revenues going to the support of general government. And with determined opposition to any increase in property taxes, plus violent opposition to any plan to increase the sales tax, the suggestion that the gas tax be used as a general revenue measure will undoubtedly have strong support in some quarters.

The proposed amendment to allocate 1-2 cent of the gas tax to the cities is sponsored by the League of California Municipalities and is likely to have the support of such powerful groups as the two state auto groups (leading opponents of the diversion proposal), the st ate chamber of commerce and possibly the state department of public works.

At the present time, under an amendment enacted during the 1933 session of the legislature, the cities are allocated 1-4 of a cent of the tax for city street work. In addition to asking that the 1-4 cent be increased to 1-2 cent, the league of municipalities will make o drive to have the state finance all expenses of state highways within cities—approximately 1,000 miles, in total!

---

California farmers, considering the various tax proposals, must not render hasty judgment. The financial crisis at the 1935 session of the legislature will be the greatest in the history of California state government. And when the smoke of battle clears from the general election, every California citizen, if he values his pocketbook and the welfare of his state, must give serious attention to the financial dilemma confronting government.

To further constructive action, every group sponsoring tax amendments should submit its proposals to public scrutiny before the legislature convenes. And California taxpayers should take time off from their personal affairs to make their partnership with government a reality, rather than a theory.

---

### The "Black Mollie" Fish

The "Black Mollie" is the black or melanistu phase of Mollienisia latipinna, a fish found in large numbers along the coast of Florida. The normal color of Mollienisia latipinna is an olive green with tiny red and blue markings all over the body. Black specimens are found in the native state, but most of the jet black ones found in Aquaria have resulted from selective breeding.

# RADIO PROGRAM TAKEOFF AMUSES O-C CLUB WOMEN

A busy and interesting afternoon was enjoyed by members of the Country Woman' club Monday when several important items of business were acted upon and a unique program was presented.

Several minor amendments to the constitution and by-laws were adopted, and Mrs. Julius Bachman was elected to membership.

William N. Lloyd, manager of the local Community Chest campaign, requested through Mrs. R. H. Hyde as spokeswoman, volunteers to aid in the drive in canvassing Meridian district. The following ladies responded to the appeal: Mrs. Hyde, Mrs. E. R. Kennedy, Mrs. W. H. Stray, Mrs. A. D. Rice, Mrs. Floyd Bohnett, Mrs. Elver Bohnett, Mrs. J. C. Ainsley and Mrs. G. S. Robson.

The president, Mrs. C. H. Whitman, then announced Mrs. Florine Peake as chairman of the program committee, with Miss Anne Schulte as co-member.

The south end of the hall had been arranged to simulate a broadcasting studio with the microphone concealed behind screens, leaving space in front as a small stage, decorated with floor lamps, a tall wrought iron floor candelabrum with lighted tapers, and tables with large bowls of gorgeous chrysanthemums.

Mrs. Peake as announcer stated that the "Irrational Broadcasting company" was trying out television over station CWC in the Orchard City of California, and the first presentation would be a dramatic number, the "Closet Scene" from Hamlet, interpreted by Miss Anne Schulte. This scene was given in Miss Schulte's usual effective style, which she followed with a song, "Sitting In the Corner," that, according to the announcer, would take the radio audience from the "sublime to the ridiculous." Mrs. L. J. Carboni was "at the piano" for the latter number, and also gave the station identification chime at proper intervals.

Miss Helen Kalas was announced for a series of song groups "for the benefit of the Lillian Nordica Foundation fund." Miss Kalas is a great favorite with Campbell audiences and is becoming widely known throughout the Peninsula and bay cities and is also heard on the radio.

Her selections included in group one, "Bid Me to Love," "Now Sleeps the Crimson Petal," "Four Ducks In A Pond," "Morning Serenade;" group two, "Butterflies," "Luxemburg Gardens," Spanish Song, "Grant These Glances," "To A Messenger;" group three, "Dreams," "Twilight," " Lazy Song," " Love's In My Heart." The Spanish song is the one which Miss Kalas sarg in the recent pageant at the University of Santa Clara. Miss Bozena Kalas was her sister's accompanist.

"Ten Minutes from An Old Scrap Book" occupied the "Flossie Friendly Hour." Among the recipes read was "Cooking A Husband."

The next program as announced by "Annie Laurie" was a one-act drama, "Catesby," by Percival Wilde, presented by the Little Theater Guild of Winchester Road." The actors were Mrs. Florine Peake and Miss Anne Schulte.

The concluding broadcast was by "Mrs. Walter Clinchell," "Fame and Scandal Everywhere." This was a composition by the two sponsors of the program and was a humorous collection of local bits on members of the club and their husbands.

The entire program was most successfully carried out, and the audience was generous with applause and compliments.

The next meeting will be held Monday, Dec. 3. The date for "men's night" has ben set for the following Monday, Dec. 10.

### Never Stops Raining

There is a place where it never stops raining. It is located, notes G. R. Turner in the Kansas City Times, in the most sparsely settled part of Paruguay, not far from the border of Brazil. There, in the valley of the Para river, where the Parana divides its waters into 21 arms, is the wettest spot on earth. Rain has been falling steadily there for at least 100,000 years. The phenomenon is explained by the fact that a prevailing wind blowing constantly in one direction over the Great Guayra falls catches the spray of the falls, forms the spray into clouds, and then blows the clouds far over the country where the cloud vapor condenses and falls to earth in the form of perpetual rain.

# Stae To Play Willamette Mon.

Down out of the frozen north, as the writers would have it, comes the Willamette college football team, probable champion of the Northwest conference, to play ball with San Jose State college on the San Jose gridiron Monday.

Events of the season have so shaped themselves that the State-Willamette game assumes considerable importance. The San Jose squad is tied for the conference championship, and anticipates emerging to the top of the heap.

Later in the season, the Spartans will play Whittier, almost certain champion of the Southern conference. Thus, in the meeting of these three potential champions, fans will find an excellent indication of the relative strength of the three major small-college conferences of the Pacific coast.

San Jose continued its freak series of tie games Saturday with a 7 to 7 deadlock with Fresno state, heretofore regarded as strongest taem in the conference. After playing second fiddle the first half, Coach Dud DeGroot's Spartans came back to push the Fresnans about almost at will.

San Jose scored when Captain Dario Simoni, tackle, broke through to block a Fresno punt and then fall on the ball in the end zone. He added the extra point, taking credit for every one of 17 points scored by the Spartans in their last two games.

In the previous contest, with Nevada, he intercepted a pass for a touchdown, added the point, and made good a 40-yard place-kick.

The San Jose squad will be in excellent physical condition for Monday's contest, and local fans are anticipating the battle of the season.

---

### Animal Acrobat

The wart-hog is probably the ugliest animal that nature has created, and every time it leaves its burrow it does a double somersault in the air outside its front door! Incidentally, it lives in a burrow made by another animal; it doesn't trouble to build its own home.

---

### Effects of Erosion

At least 3,000,000,000 tons of soil material are washed out of the fields and pastures of America every year. Over 400,000,000 tons of solid matter are dumped into the Gulf of Mexico every year by the Mississippi alone, together with many more millions of tons of dissolved substances.

## *New Ways With Corn*

CORN crops up nowadays in unexpected places. Every housewife in America knows how to serve it in the usual ways, and knows that her family will enjoy it, but has it ever occurred to you, for instance, to use it to stuff green peppers to be served with corned beef hash? Here is the way to do that:

*Corned Beef Hash with Stuffed Green Peppers*: Add a little water, if necessary, to the contents of a No. 2 can corned beef hash, season more if desired, and brown well on both sides in a skillet with some hot fat. Remove to a hot platter. Cut two large green peppers in halves lengthwise, remove seeds and white fibre, and fill with the seasoned contents of an 11-ounce can corn. Cover with buttered crumbs, and bake until crumbs brown and peppers tender. Arrange around the hash. Serves four.

### Whole Kernel Corn

Then there are the dishes in which canned whole kernel corn goes particularly well, such as

*Corn Fritters*: Chop the contents of a 10½-ounce can yellow bantam whole kernel corn, or put them through a food chopper. Add two well-beaten eggs and one-fourth cup milk. Add two-thirds cup flour, one teaspoon salt and one-half teaspoon baking powder. Drop by spoonfuls into hot fat or drippings in a skillet and brown on both sides. Makes sixteen fritters.

*Corn Salad*: Marinate the contents of three 12-ounce cans whole kernel corn and one and a half cups grated or finely-chopped raw carrots in one cup French dressing for an hour or so in refrigerator. Add one cup shredded ripe olives, and serve in a nest of lettuce. Serves fifteen liberally.

---

Miss Marion Peake, who returned from O'Connor's sanitarium last week, where she underwent an apendectomy, is convalescing at her home near here.

# Literature Class Open To Adults

The Campbell high school evening classes for adults present many interesting opportunities. Not the least among them is a class in contemporary literature, given by Mrs. Marion Howes. New members are welcome to this group which meets Thursday evenings between 7 and 9o' clock, with the exception of this week, when the class meets tonight.

### Drinking Water on Liners

Ocean liners distill ocean water to use for drinking only in emergencies. Ordinarily, an adequate supply of fresh water is carried in tanks from which it is pumped to the upper decks and filtered and delivered by gravity to various points about the ship.

---

### Provision of Constitution

The Supreme Court of the United States is unique. It is the only Federal court of the country which has its existence provided for in the Constitution. Other courts were created by statute.

## HIGH SCHOOL NOTES By R. B.

While playing football Friday afternoon with a number of classmates during gym period, Dennis Bennett slipped and sprained his wrist. He was rushed to the doctor's by a couple of students. The doctor stated that it was nothing very serious, but Dennis, to be on the safe side, is carrying his arm in a sling.

—CUHS—

Those who received the Green Hand degree at the initiation last Thursday evening were: George Kirasaki, George Yuki, Howard Imana, Lester Peterson, John Nunes, George Lawrence, Joe Lamort, Alen Heeper, Don Canciamilla, Sal Teresi, Peter Ricci, Anthony Sunzeri, Glen Rowe, Anthony Rees, Sam Tuso, Alvin Picket, Ernest DeRose, Joe Covetto, Edmund Mendosa, Anthony Satarano, James Park and Vincent Lovi.

After the program, which was held in the Annex auditorium, the Centerville chapter of the Future Farmers played the Campbell chapter a basketball game on the local court. Campbell won 15 to 9.

—CUHS—

Campbell high school's eleven will play the Los Gatos Wildcats this Friday afternoon on Campbell's new football field. Campbell played Los Gatos Thursday, Oct. 25, on the Wildcats' turf and lost by a slim margin of 7-6.

The tentative line up will be as follows: F. Lovoi, R. James, B. Thompson, P. Arnold, J. Bohnett, T. Pisano, V. Tedesco, H. Hyde, P. Kantlehner, P. York, R. Keesling, L. Garrens, J. Connetto, A. Sartariano, R. Tuso, V. Karnagyd, W. Brown and B. Farum.

—CUHS—

In the shop class, which is under the direction of Mr. Hughes, the boys have taken over all the repair jobs about the school. Under these jobs which they have done may be included the following: wiring and installation of lights on the south and east corners of the gym installation of flood lights in the court of the annex to illuminate the fence which encloses the court, and a door and entrance which is being installed in the west end of the gym and which will lead into the nurse's room. The shop class has also taken over all of the glazing work for the school.

—CUHS—

A girl's sports day will be held at Campbell this Thursday afternoon. Los Gatos will bring two teams, Palo Alto one, and Campbell will be represented by their three teams: the Reds, the Blues and the Golds.

On the refreshment committee which will entertain the visiting girls are: Margaret Bowling, chairman; Vivian Johnson, Jenny Abinante, Ruth James and Angelina Sperriall. Those who will be referees, generals, etc., are as follows: Laura Mae Samford, Iona Kiperash and Mary Furtado.

—CUHS—

Campbell's two lightweight teams won their third straight double victory last Friday night by trouncing Fremont. The 110's won an easy victory, the final score being 23-6. Vincent Fisci was high point man with a score of 11 points. Glen DuBois was next with 5 points and George Kurasaki and Tom Ogeno each scored 4 points.

The 120's nosed out Fremont in the last quarter by a score of 27-20. Jack Boyto was high point man with 12 points, Anthony Sunseri and Stuart Wellington each tallied 6 points. Basil Howe chalked up 2 and Kaleb Borge helped the score along with one point.

This week Campbell will play Santa Clara on the home court. Coach Noddin states that providing the 110's win the next two games they will receive the championship.

## Ducks, Upland Game Plentiful

San Francisco, Nov. 7—Scatter guns will be kept busy the remainder of the year.

The state fish and game commission announces the following seasons open on game.

The duck season is in full swing, and with cold weather in the north more ducks and gees are expected to wing their way into the state. Where water is plentiful hunters have had good luck so far this season.

On Nov. 1 the quail season opened in District 11-2, comprising Humboldt, Del Norte and the western portion of Siskiyou counties. Other districts open on Nov. 15, and the season closes Dec. 31 in all districts. The limit on mountain, valley and desert quail is 10 of each variety per day, with possession of 10. Not more than 20 birds of each species may be killed each week.

Nov. 15 marks the opening of the second pheasant season in California, closing one-half hour after sundawn Nov. 20. Last year over 25,000 preasants were killed in the state during the first open season California has ever had on these upland game birds. The bag limit is two male birds per day, with possession of two.

Rabbits may be lawfully hunted in all districts starting Nov. 15 and, with the exception of Districts 4, 4 3-4, 19 and 21, the season is for one month. The districts named have no closed season on rabbits.

The bag limit on rabbits is 15 per day and 30 per week.

Then on Nov. 16 the season on bear and fur-bearing animals opens.

The wild pigeon season opens on Dec. 1 for a 15 day period. Hunters will be permitted to take 10 pigeons a day, possess 10 and can kill 20 a week.

With the exception of southern California counties, the quail outlook is very promising this year, according to reports of wardens.

In the Sacramento valley, San Joaquin valley, in the northern counties and along the southern coast quail have increased noticeably this year, write these wardens.

The following wardens say "indications point to a good quail season:" Capt. Al Willard, Rocklin; A. W. Sears, Placerville; Paul Turner, Paso Robles; Nelson Poole, Sacramento; J. W. Thornburg, Lake Alpine; F. C. Jackson, Santa Barbara; Earl Hiscox, Auburn; Victor E. VonArx, Santa Rosa; C. R. Peek, San Mateo; Vernon Sutton, Lodi, Ray Diamond, Willits; William Kaliher, Fortuna; Rosewell Welch, Kernville.

In the pheasant country like reports come in. August Bade, superintendent of the state game farms, estimates the number of pheasants in the uplands of the state at approximately one million. There were killed last year 25,000. This year there have been liberated from the Yountville game farm some 12,000 which, with the broods reared by liberated birds, the loss from last year's hunting is more than overcome.

Philip Robson is quite ill with a very severe cold.

*STATEMENT OF THE OWNERSHIP,.. MANAGEMENT,.. ETC., REQUIRED BY THE ACT OF CONGRESS OF AUG. TWENTY-FOURTH, NINETEEN-TWELVE*

of The Campbell Press, published weekly at Campbell, California, for October, 1934.

State of California )
)ss.
County of Santa Clara )

Before me, a Notary Public in and for the state and county aforesaid, personally appeared Richard H. Knappen who, having been duly sworn according to law, deposes and says that he is the Managing Editor of The Campbell Press and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act. of Aug. 24, 1912, embodied in Sec. 411, P L & R.

That the publisher is Harry C. Smith, Campbell, Calif.

That the managing editor is Richard H. Knappen, Campbell, California.

That the owner is Harry C. Smith, Campbell, Calif.

That there are no bondholders, mortgagees, etc.

Richard H. Knappen

Sworn to and subscribed before me this seventh day of November, 1934.

## Cambrian School Club In Meeting

Members of the Cambrian Home and School club met this afternoon at the school house, where Mrs. Mabel Keesling, principal, told an interested audience of her recent motor trip east. )

Mrs. Louis Shelley exhibited specimens of handiwork done at the local night school, and offered several items for sale, a part of the proceeds to go to the Cambrian club.

Mrs. Maynard Knopf, president of the group, presided at the business meeting.

**Jefferson Davis Lost an Eye**

After graduating from West Point, in 1828, Jefferson Davis remained in the army seven years. While serving in Wisconsin a severe attack of pneumonia left him with a facial neuralgia that often incapacitated and sometimes blinded him. After his election to the United States senate he suffered considerably from poor health, and, according to "Jefferson Davis, Political Soldier," by Elizabeth Cutting, he "eventually lost the sight of one eye."

To those who say the Government has taken over all relief, Harry L. Hopkins, Federal Relief Administrator, says:

"Federal funds for unemployment relief can go only a little beyond providing the physical necessities of life. Community demands for other social welfare services must be met almost entirely from local resources. The larger part of the funds for these needs will have to come from private giving to Community Chest and similar campaigns."

The problems of child welfare, health, recreation and character building have true significance in the local communities. There is no way that Federal relief funds can be applied to these broader needs of social welfare.

WHY PRIVATE GIVING MUST CONTINUE—

1. Federal And State Government Tax Funds Provide———
Food—Clothing—Fuel—Shelter—Work Relief Wages—Agricultural and Home Loans to cover needs arising directly from unemployment.

2. County Tax Funds Provide———
County Hospital—Preventorium—Sanatorium—County Departments of Health——Detention Home—County Almshouse—Relief for the Indigent and other services supported in the past by local taxation.

3. Campbell Community Chest Agencies through private giving, Provide———
Food for undernourished children—Support of Boys' and Girls' Clubs—Clothing Distribution—Emergency Relief—Campbell Library.

Now is the time to protect Our Chest and thus help to stabilize our community. Certainly the Government is helping, but each local community has to do its own part.

Co-operation and team work between Our Chest and the Federal Government is the way to succeed—it is not a one-sided job. Accept your responsibility and do something.

CAMPBELL COMMUNITY CHEST

## BOYISH PAJAMAS THAT HAVE STYLE

PATTERN 1946

Whether at school or college, or right here, you will adore having these boyish pajamas. They are trim and slim and graceful, from little round collar to trouser hem. The pointed yoke gives them a shirtmaker touch—and style. You will find them perfect for your favorite fabric be it silk, cotton or flannel—if you don't care for a fancy stuff make them of plain in a lovely color—sea green, for example—or peach. For the beginning dressmaker they are a perfect first garment.

Pattern 1946 is available in sizes 12, 14, 16, 18 and 20. Size 16 takes

4 yards 36-inch fabric. Illustrated step-by-step sewing instructions included.

Send FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address and style number. BE SURE TO STATE SIZE.

Address orders to Sewing Circle Pattern Department, 243 West Seventeenth Street, New York City.

Customer — Nearly!—London Answers.

## Washington Digest

National Topics Interpreted
by William Bruckart

Washington. — With assurance that Joseph B. Eastman, federal co-ordinator of railroads, is going to recommend in reports soon to appear, that there be more stringent regulation of the railroads, it is to be noted that Washington conversations lately have included a new idea respecting governmental relations with businesses coming under direct federal regulation. The discussion seems to center about some idea concerning the obligation which government owes whatever business it regulates and whose profits it limits.

**New Idea on Business Control**

The talk one hears in many places is to the effect that if the government, or any government, lays down rules which prohibit a business from reaping the profits that accrue in good years, by the same token it ought to consider some form of compensation to that business in the periods of depression through such as we are now passing because it has refused to permit that business to create a huge layer of fat upon which it can feast in the bad years.

Advocates of such a theory, of course, have immediately found opponents. In other words, two very definite schools of thought have developed and although the question is nowhere near a solution nor is it likely that the forthcoming session of congress will even approach an answer, one can hear arguments pro and con on the point most anywhere the subject is broached.

The proponents of the theory that the government owes an obligation to those businesses which it has regulated within an inch of their lives contend that investors—which means the public who own shares of stock—are being discriminated against by their own government. Their claim is that a business cannot survive unless it is enabled to store away profits of the good years against which it may draw when the prolonged economic depressions strike. The result is, according to this argument, that unless the fat is stored away after the manner of the bear in preparation for winter, investors can expect only to see their savings destroyed from time to time, and this with the sanction of their own government.

In opposition to this new theory of relationship between government and business, one hears the usual denouncements of the sins of the railroads and the public utilities, but one also hears complaint that if the federal government should embark upon a policy of compensating those businesses which it regulates, it might be placing a premium on mismanagement and even downright crookedness. It is argued likewise that the federal government must not use taxpayers' money in this manner nor that it should employ the policy of compensation, as that amounts to a subsidy.

At any rate a new field has been opened. On each side are to be found vigilant and virulent defenders and from this time it is made to appear that congress is eventually going to be compelled to decide how far this regulation of business can properly go. From all of the arguments here, it would seem that each side has solid ground upon which to stand. It may be possible that from this controversy something in the way of a new economic policy will develop. The Roosevelt administration has gone farther than any other in history in its regulation of business, and there are those who believe that a reaction is due. If that be the case, then it appears logical at least that the two opposing forces may bring about a compromise that will be favorable to general business, which is subject to regulation, and enable those who place their savings in stocks or bonds of such utilities to feel reasonably secure about some sort of annual return.

* * *

**Solution Not Simple**

Solution of this question of equity between the government and the businesses which it regulates is not as simple as it may superficially appear. For example, the question is put forward whether it is possible to evolve any method of measuring, even roughly, the extent of the public obligation. It is likewise necessary to determine in advance of a final answer to the question, whether the past inequalities and past treatment of public utilities is the factor to be considered. There is a question whether the government is openly to assume a direct voice in the management of properties which it regulates if there is a compensating arrangement to protect investors in those businesses. Then, it goes into the question of government ownership or government control of private industry.

Some of the advocates of this program of compensation call attention to the public necessity for maintenance of service, such as the railroads supply, for example. In the case of the railroads and shipping, with perhaps the addition of the growing aircraft industry, it is admitted that there is a willingness on the part of those lines of commerce to aid the nation in time of war.

Should the government engage in distribution of taxpayers' money to offset deficits in the lean years, opponents of the policy say that we should be headed for an even greater bureaucracy than has been set up to accomplish recovery under the present administration. Obviously, many business men will not be in favor of further extension of bureaucracy. They have had their fill of bureaucracy under the codes.

The form of assistance is another problem. If it were not in the form of a money payment direct to the businesses concerned, then the subsidy must be worked out on another basis. It has been suggested that the regulations themselves might be used to enable some returns not now available. One theory advanced was that the regulations should be flexible and that in the lean years there be some relaxation of the restrictions so that the regulated business might proceed more freely in operation.

Another thought heard is that there should be consideration given to competing businesses such, for example, as is the condition between the railroads and the highway users. It is of record, of course, that trucks and busses and privately owned vehicular traffic use national and state highways, built out of taxpayers' money and they do so with the very minimum of taxation. The railroads, as competitors of these lines, have no such beneficent attitudes displayed toward them by the government which, at the same time, has been bearing down with its regulations.

* * *

**Both Parties Show Weakness**

As one looks backward upon the campaign of 1934, the methods employed by the two major parties appear worthy of examination. Observers in Washington, I believe, are of the opinion that the campaign developed an outstanding circumstance, namely, that the Democrats lack defensive ability and the Republicans have shown an utter inability as an offensive party.

In all of the debates and the speeches and the statements forthcoming from candidates on either side, there is proof of the conclusion above reached. Some political writers in Washington and some political leaders take the position that when the Democrats were put to the necessity of laying down a fresh program, they failed on the job. They gave the impression of politicians running largely on momentum.

The minority party, if such the Republicans may be called, was wholly unable to take advantage of known vulnerable points in the Democratic armor. The net result was obviously that there was much haranguing and much mud-slinging in what should have been real national issues, but nothing came of it.

The campaign, therefore, has demonstrated in my opinion the need for a strong minority party whether that party be Republican or Democratic. The party in power necessarily is on the spot because it is charged with the responsibilities of government. It is the function of the minority party to criticize and offer counter proposals. The most astute politicians see that condition and, I believe, are at a loss as to what it means for the future.

* * *

**Favor Mergers**

The federal communications commission, one of the new agencies set up by the Roosevelt administration as a permanent part of the nation's regulatory structure, is preparing to ask congress for an amendment of the communications act of 1934 enabling it to approve mergers. Of course, the particular problem involved in the communications program is the question of mergers of such gigantic corporations as the Western Union and the Postal Telegraph companies and some of the radio companies. The implications and the potentialities of this movement, however, go much further.

It is too early to attempt a forecast of congressional opinion on the communications proposal but it is an opportune time to consider what may happen if congress should approve this step toward creation of single businesses for single lines of service in this country.

It is regarded also as interesting to examine the effect upon the country if it were to be subjected to a well regulated monopoly of all the business in that line such as has occurred in the case of the Bell Telephone system.

Some members of the commission and its staff feel that a merger of the large telegraph companies, for instance, would result in establishment of a more closely knit network of telegraph lines and offices than now exists.

## BRISBANE THIS WEEK

**Sun Spots and Wars**
**No Toy Pistol, Money**
**Plain Language Needed**
**Why Revive Sparta?**

The Abbe Moreaux, looking through his telescope in Bourges observatory, says, "Beware of 1936 and 1937." Sun spots will increase violently in those two years, according to the abbe, and when sun spots increase "we have wars and social disruption."

On the other hand, according to the reverend observer, when the sun is calm, "the world usually has been at peace."

---

Others believe that "spots" causing war, international and individual hatreds, are not sun spots, but spots on the human brain.

Many "spots" will have to be removed from the human brain before war can end.

---

Indiana is investigating two officials connected with the prison from which the late Mr. Dillinger escaped, supposed to have frightened his jailers with a toy pistol.

New evidence indicates that, instead of frightening somebody with a wooden pistol, he bribed somebody with good real money.

Half the success and immunity of the usually dull-minded criminal is based on the corruption of public officials, and criminal lawyers ready to accept criminal money.

---

The New York Times quotes "one of the most distinguished of all British diplomats" as follows: "Anglo-American relations have never been in such a grave condition since the war."

There is talk of Japan having a navy as big as England or America, with England's consent, England building 70 cruisers, etc.

Some Americans would like to know why Uncle Sam does not say to Japan and England: "Build what ships and make what new secret treaties you d—n please. We shall do as we please." We have had in America men that would send such a message to any group of treacherous "friends."

---

Rome reports that Mussolini, determined to make Italy a really militant country, ready to fight anybody at the drop of any hat, plans a "New Italy" with the motto, "Back to the glory of the Caesars, A revival of Sparta."

All right about the Caesars, but Sparta did not work out well. Where is Sparta now? Where is the ancient glory?

Fighting will be done hereafter by scientists, chemists with poisonous and explosive gases; engineers with fast planes, deadly air torpedoes. Fighting will be in the air and under water. No need to make a whole nation parade and drill.

---

An oasis of cheerfulness in this world of gloom is Leonid M. Tolokonski, Russian consul general in New York. Many things make him happy, including the fact that Russia can produce everything she needs, "except bananas and coffee." She is growing fine grapefruit now, can worry along without any bananas and drink tea, instead of coffee, as she always has done. Russian coffee never was very good, anyhow.

---

The late Australian general, Sir John Monash, described in Lloyd George's memoirs as the "only general on the British side who could have successfully replaced the late Field Marshal Earl Haig as commander in chief of the British forces," was of Jewish descent.

Fighting ability in that race surprises nobody, for some of the greatest fighters in history, including Hannibal and his father, were of the Semitic race.

---

A well-known actor, Lou Tellegen, who used to play "perfect lover" parts, and married four ladies, including Geraldine Farrar, lost his popularity and has killed himself after telling his friends "there is no place in Hollywood for a has-been."

There is no place anywhere for a has-been, but, fortunately, there is no need to remain a has-been forever.

---

San Francisco rejoices in completion, after twenty years of work, of the great Hetch Hetchy project, a $100,000,000 undertaking that brings pure water 150 miles from the high Sierras in Yosemite National park.

A great bridge is building over the beautiful Golden Gate that leads in from the Pacific ocean, and soon San Francisco will be connected by road with the great city of Oakland, across the bay.

---

Veterans demand their bonus now, without shilly-shallying or tergiversation.

It is said that the President "will oppose with all his strength any effort in congress to pay the bonus now."

Veterans need the money now while times are hard and their children are young.

## True Detective Story

by Vance Wynn
© Public Ledger

### The Spy Plot That Failed

IT WAS during the early days of the World war that a rough-looking man, who posed as a Belgian, began to frequent one of the branches of the Carnegie library in Pittsburgh.

He was poorly dressed, wore a scraggly beard and seemed to have all of the time in the world.

Usually he went to the reference department of the library, and spent hours in reading books that had reference to America. He paid particular attention to the maps and one night was seen to be tracing some of these from one of the geographical works in the library.

Miss Frances Langfitt, the assistant librarian, noticed the man, and her suspicions were aroused.

So while the fellow spied around the shelves the young woman did a little spying on her own account.

Night after night she sat there with a green shade over her eyes apparently engrossed in her work, but in reality keeping tabs upon the Belgian who was not a Belgian.

One night she watched him replace a book on the shelf, and when he had departed she hastened over to that part of the library and obtained possession of this particular book.

It contained a coastwise map, and gave evidence of having been traced.

Before the next day had dawned the patriotic young woman had informed the Department of Justice of her suspicions of the man who had been visiting the library.

Operative Henry—that will have to be his name for the purpose of this article—was placed on the case at once.

He traced the man and found that he was a stranger in the city.

He located the house where he had a room and discovered he was going by the name of Jacob Harmon.

The fellow must have sensed the fact that he was being followed, because he ceased his visits to the library.

About the same time an undersized man with a decidedly German accent began to frequent the library.

When interrogated he gave the name of Emil Mayer.

This man pursued pretty nearly the same tactics as the other, but on the surface there did not seem to be any connection between the two.

One day he was followed to his room, and later in his absence a search was made of his effects.

There was nothing absolutely criminal, but the detectives did find a number of papers and tracings.

In themselves they seemed meaningless, but if it were possible to put them together they might have meant much.

At all events, the work of shadowing Harmon and Mayer continued without interruption.

Two and two were put together and the conclusion of the authorities was that the library had been made the rendezvous of German spies for nearly a year.

Of course it goes without saying that there was nothing in the library that was not open to the public at any time.

But the conviction grew that Harmon and Mayer were doing the preliminary work, which was afterwards verified by bolder and more audacious men who stole into navy yards and laid the foundations for destroying munition plants.

Operative Henry had several conversations with Miss Langfitt and he compared this with the reports which were brought in as a result of the shadowing of the two Germans.

Up to this point they had never been found together.

In the meanwhile an attempt was made to learn something of the previous history of the two men.

One of them it was learned had been visiting a number of seacoast towns in New England and it was also alleged that he had not complied with the alien enemy registration laws.

One night United States agents started to follow the two men and then for the first time they joined one another in a little back room in the northwestern part of Pittsburgh.

They sat at a table and produced a coastwise map which they began to study.

That was the signal for the detectives.

The subjects were arrested and in twenty-four hours had been placed in a detention camp.

What became of them no one will tell.

The mystery has gone into that limbo which is the repository of so many war secrets but to this day there are persons in Pittsburgh who are satisfied that the timely discovery of the librarian cut off the connection between these men and the German war office.

### Location of Southampton

Southampton is but 632 miles farther away from Buenos Aires than New York, although it is 936 miles farther north than the American metropolis and is on the other side of the Atlantic.

### COLORED ROADS

Colored roads are the subject of the newest experiments in Italy for the further improvement of motor traffic movement. The roads of Italy are ideal for motoring save for their shiny surfaces, which are equally annoying under the brilliant sunshine of Italian daytime or nocturnal headlights. Coloring, it is suggested, would remove the brightness of the road surface and different colors could be used for different localities, so that every motorist would know the road to take to get to a particular place. The coloring matter is to be mixed with the surface dressing of the road and nonfading tints are being sought.

### SYNOPSIS

At the close of the Mexican war, Robin Kershaw, with his bride, rode into northeastern California. Here he found an ideal valley for ranching and cattle raising. They christened it Eden Valley. Below Eden Valley is a less valuable tract which Kershaw's wife names Forlorn Valley. Joel Hensley settles in the lower half of the valley. There is bad blood over fences and water. Kershaw kills Hensley and the blood-feud is on. By 1917, Rance Kershaw, his son Owen, and daughter Lorry are all that remains of one clan. Nate Tichenor is the sole survivor on the Hensley side. Returning, after an absence of nine years, he goes to help Lorry in her car and finds her father has died of heart disease. Silas Babson controls the Forlorn Valley settlement through his bank. He schemes to control the irrigation and hydro-electric possibilities of Eden Valley. The banker proposes to play Nate against Lorry, assuming that they are carrying on the old feud, in this way getting control of lands necessary to the project. Nate, however, has no intention of carrying on the feud. He tells Lorry that he and Owen, Lorry's brother, met in France just before Owen was killed.

### CHAPTER V—Continued

—5—

"Nothing, Miss Lorry. His face sort of twisted. You see, we were all exhausted and hungry and thirsty and we'd been through a lot of mud and blood and I suppose we each had the same thought—that the Hensley-Kershaw feud was a pitiful thing. I know I had a vision of Eden Valley just then. Perhaps Owen did, too, because he commenced to cry silently; and then he came toward me and I commenced to cry, too. We didn't say anything, because there was nothing to say; just leaned against each other and thumped each other's backs and were quiet about it. Owen walked beside me up the road a little, his arm through mine; and finally he said: 'Nate, maybe my dog tag will beat me back to Eden Valley. But if you take care of yourself, you're liable to go back with both your dog tags; and when you do, call on the old man and Lorry and tell them it's an order from me that you're to stay for dinner.'"

"Did he say anything about the water?"

"Yes, he said we were to have it and that he'd write home about it as soon as he got the opportunity. So I told him you'd already promised to let my people have it and that pleased him. And I promised him I'd be a good neighbor and fight as hard for the Kershaws hereafter as our clan had ever fought against them. That affected him very deeply and he dragged me off the road and we swore blood brotherhood, each to the other—and then we embraced like two sentimental Frenchmen and were ashamed of it because we were both hillbillies—and I went on with my section and he went back and flopped with his weary squad—and here I am, and I've been a long time getting here."

"Why did you delay, Nate?"

"I kept remembering him"—he pointed to the bedroom door—"and how he spoke to me that morning I came to ask for the water. I was afraid he'd never understand—so I thought I'd wait and not bother him and gradually inculcate in him the belief that I wasn't a bad sort of citizen. I see now that was poor strategy."

"Life," the girl said drearily, "is a game that is played to be lost."

His hand strayed over and imprisoned hers. "Poor little sister!" he murmured. "So hopeless and bitter—and the sun just rising over Eden after a long eclipse. Life may be a game that is played to be lost, but we'll play it like sportsmen and go smiling to our defeat."

### CHAPTER VI

NATE TICHENOR slept at the Bar H that night, but returned to the Circle K early next morning, with two men he had picked up in Valley Center. He set them at once to the task of digging Rance Kershaw's grave in the family cemetery, Lorry Kershaw pointing out to them the desired spot. About noon the coffin arrived from Valley Center and he helped the man who delivered it place Kershaw in it. Then he lunched with Lorry and Miss Bachman. At one-thirty he and Lorry hitched a team to a wagon and he drove it around and tied the team in front of the house. At two o'clock the girl met his inquiring glance bravely and said:

"We might as well proceed, Nate. Nobody's coming to my father's funeral."

With the aid of two of the hired men he carried Rance Kershaw out to the wagon and, mounting the seat, drove his late enemy on the latter's last pilgrimage, while Lorry, Miss Bachman, and the two laborers followed in the Kershaw car. At the grave Tichenor read the funeral service, the men covered the grave. Tichenor gave them each a ten-dollar bill and with Lorry and Miss Bachman returned to the house.

He was rather proud of the manner in which Lorry had carried on, even though he had expected her to exhibit the traditional courage of her clan. Throughout the remainder of the afternoon he sat with the two women in the ranch house veranda and was talkative to a degree only excusable in his own mind because he had the customary masculine belief that it was his duty to keep Lorry's mind off her troubles.

The two days that followed Rance Kershaw's funeral were spent by Nate Tichenor at the Bar H headquarters, until his old superintendent, Rube Tenney, should arrive and, with his wife, assume the duty of looking after Lorry Kershaw's affairs and keeping her company. He spent those two days looking over his decayed estate and formulating plans for its restoration, but in the midst of these thoughts his mind constantly shuttled back to a consideration of Lorry Kershaw and her affairs. He did not know Silas Babson except by sight; hence, lacking knowledge of the man's character, he was at a loss to know why Babson had so suddenly turned on the Kershaws. Was it possible he had purchased the mortgage because he feared the holder of it might grant an extension? If so, then Babson desired it, not as an investment, but as a weapon. Nate decided finally to try a shot in the dark and halt Babson's operations before they had fairly started.

The inability to puzzle out a trail had always annoyed him; he knew, too, it must be annoying and harassing Lorry Kershaw to a far greater extent.

She was a fine girl, and if he was going to be her neighbor he desired her friendship, not only for both their sakes but for the sake of all the Hensleys and Kershaws who

"That Affected Him Very Deeply and He Dragged Me Off the Road and We Swore Blood Brotherhood."

had died with their boots on. He'd promised Owen Kershaw he'd wave the olive branch, if and when he should get back to Eden Valley. . . . What a fine-looking lad that Owen had been! . . . All man . . . unexpectedly sentimental. . . . Well, he'd been out of Eden Valley to a private school for a few years. . . . He'd been civilized.

"Yes, Owen," Tichenor soliloquized, "it is hard to accept too many favors from a traditional enemy. The suspicion, distrust, and dislike of a half century aren't to be eradicated in a day . . . and she did throw my check in the fire! Well, she has something I want and I'm willing to pay for it and pay heavily. . . . That cursed feud is dead and I'll not revive it with a lawsuit. Why rub into the girl the knowledge that I'm rolling in money while she's bankrupt?"

Forthwith he motored into Gold Run and telephoned to his attorney in San Francisco. "Tichenor speaking, Paddon. Listen carefully. Ranceford Kershaw is dead and has left a bankrupt estate to his sole heir, a daughter named Lorraine. But two years ago he gave a deed of gift to his daughter of those four thousand acres I spoke to you about—you have the legal description. Well, Lorraine Kershaw filed that deed of gift for record very recently, as I discovered when running down the title at the court house in Gold Run. The local bank holds thirty thousand dollars' worth of Rance Kershaw's notes, unsecured, overdue and with interest in default, and the president and controlling owner of that bank holds also an overdue first mortgage in the sum of two hundred and fifty thousand dollars, with a year's interest in default. In addition the Kershaw estate owes the Bar H Land and Cattle company more than three hundred thousand dollars. The bank and the banker are going to foreclose, but the Bar H isn't."

"Good news," the lawyer interjected, as Nate Tichenor paused for breath. "It would seem that the girl is not in a position to hold you up, so you ought to get that four thousand acres cheap."

"Precisely. But I'm not going to give her the opportunity to begin to think she can hold me up; there'll be no argument as to the price. I'm mailing my bank in San Francisco today a check in its favor for four hundred thousand dollars, with instructions to issue a certified check in favor of Lorraine Kershaw and send it over to your office. Meanwhile, prepare a deed from Lorraine Kershaw to the Mountain Valley Power company for that four thousand acres—"

"Why not do a little trading? Offer the girl twenty an acre and work up."

"Listen Paddon. You transact my legal business for me, but I do not need you for my general manager. That land is worth four hundred thousand dollars to me if I can get it without a fight and without leaving a bad taste in Lorry Kershaw's mouth. I can afford to pay for my fancies. I have a fancy for this four thousand acres, and I fancy it now! But I do not wish to be known in the premises, so do not come up yourself to close this deal. The girl would suspect collusion. Understand?"

"Aye, aye, sir."

The following afternoon a livery car from Gold Run arrived at the ranch, bearing Mr. Rube Tenney, Mrs. Rube Tenney, and two little Tenneys, a boy and a girl. Mr. Tenney, in his younger days, had been a Hensley bodyguard, willing (albeit never called upon to do so) to kill a Kershaw out of loyalty to the bread he ate. He was riding under Nate Tichenor's father, and when the latter died was elevated to the position of ranch superintendent, which position he had held with credit and honor until Nate Tichenor had gone out of the cattle business. Rube Tenney was nearly fifty years old now, but active and still trustworthy. He greeted his old master as informally as if they had not seen each other since 1917.

"Well, I got your wire ordering me to report, Nate," Rube Tenney announced. "So I came a-runnin'."

Tichenor smiled. When the Bar H retirement had left Tenney without a job, Nate had financed his old superintendent in the lease of a ranch and a band of two thousand sheep. Sheep were and always had been repugnant to Rube Tenney, but he had worried along with the nuisances and even during those lean years had managed to make more than a living off them.

"You left a good man in charge of your sheep, I hope, Rube?"

"I sold 'em to a good man. My lease was expiring in October, an' after three bad feed years I reckoned I'd better quit before my sheep died o' starvation." He handed Nate a check. "There's the money you staked me to. I got a few thousand over an' above that. Thank God, the rest o' my life will be spent with decent, respectable cows.

"Now's a fine time to git back into the cattle business," Mr. Tenney went on. "Prices is advancin' but you can still stock up cheap."

"I'm not going back into the cattle business, Rube. But you are. You're to be riding boss of the Circle K—on the salary of a ranch superintendent."

"Ah! Closin' in on them Kershaws, eh?" Tenney grinned.

Patiently Nate proceeded to disillusion him, and while he was doing it the Tenney head wagged understanding. "Never did figger you'd be able to keep up steam like the Hensleys," he declared. "That's your father's blood. Very well, son. I'm glad to have the job."

"Miss Kershaw knows all about you—knows I've sent for you. There's a Miss Bachman staying with her at present. Tell her I suggested she send Miss Bachman back to Valley Center in this rented car of yours."

He gazed long and affectionately after the departing Rube Tenney and his brood. "Old Faithful," he soliloquized. "He doesn't suspect I bought him out of the sheep business and took a loss to do it. But it's worth it to have him back on the job—to be free of worry about that Kershaw girl and her finances—and mine. Fine joke on Rube and me if she takes a notion to fire him—for a woman's reason!"

* * * * * * *

When Silas Babson returned to Valley Center he brought with him three legal documents, all undated. One was a petition to the county board of supervisors for permission to form the Forlorn Valley Irrigation district; another was a formal application to the state water commission requesting the allocation to the Forlorn Valley Irrigation district of the flood or freshet water of Eden Valley creek; the third was the articles of incorporation of the district.

The attorneys he had consulted, Messrs. Brooks, Gagan and Brooks had agreed with him that, under the circumstances, his strategy was excellent, but had taken occasion to warn him that if Nate Tichenor and Lorraine Kershaw should decide to oppose his proposition seriously he would realize he had a fight on his hands before he got through with them.

Mr. Gagan's view of the legal aspects of the situation gave Babson little comfort. The attorney said:

"Under legislation recently enacted a state water commission has been appointed and this commission has control of the so-called unappropriated waters in all the streams in this state. There are, undoubtedly, billions of gallons of so-called unappropriated water in Eden Valley creek, and there is no doubt but that the state water commission will grant the petition of the Forlorn Valley Irrigation district for the allocation to it of these so-called unappropriated waters.

"As I understand your situation, if you can get your machinery in operation to enter a condemnation suit before Tichenor sells his dam site to this power company you suspect of having an interest in it, and before the Kershaw girl sells her lake site to the same power company, you will, by the filing of that suit, automatically ruin the aspirations of your competitor, and you may safely accept my assurance that you can win such a condemnation suit. However, what the proposed irrigation district will have to pay Tichenor and Miss Kershaw for these properties is, of course, a matter for a jury to decide. Your irrigation district will have to pay the price within thirty days or forfeit forever its right to acquire the lands."

Babson nodded his comprehension and the attorney continued: "Your first choice of an impounding dam is now owned by Tichenor and the lake site by Miss Kershaw. If these properties are sold to the power company, being a public service utility, cannot be disturbed in its possession by another similar corporation. You understand that point clearly?"

Again Babson nodded.

"We will assume that this is exactly what will come to pass. You will understand that in the position the power company will occupy, it will not have to purchase or condemn any water rights from Tichenor and Miss Kershaw. The Department of the Interior, which has jurisdiction over the public domain, will doubtless make no objection to the impounding of water by the power company, but in the event that settlers should in the future file homesteads on the infertile lands just below the power company's dam, the power company will be forced to let such settlers on lands riparian to the old channel of the stream have their fair share of the water."

"That is a contingency which will never occur, Mr. Gagan. Those waste lands, even with irrigation, will never attract anybody."

"We will assume you have the correct viewpoint. We have already assumed that you will not be able to acquire the Tichenor dam site and the Kershaw lake site. Now, have you an alternative lake site? Unless you have, just hand us a check for the cost of this interview and forget your irrigation project."

Babson drew a sheet of paper toward him and made a rough sketch of Eden Valley and the surrounding country. "This portion of the valley, which is occupied by Tichenor and the Kershaw ranches, is usually referred to as the Pan," he explained. "This narrow canyon at the head of the Pan is known as the Handle. By cutting a canal through a pass in the hills on the western boundary of Forlorn Valley and installing our flood-gate there, the water can be led from this natural reservoir by easy gradient along the northern base of the hills that form the southern buttress of Forlorn Valley and separate it from Eden Valley. Thence laterals from this main canal will lead the water over some thirty thousand acres of Forlorn Valley. There is a 10 per cent slope."

"And your diversion dam would be in the public domain, eh? Have you sufficient political influence in Washington to induce the Department of the Interior to grant you permission to erect such a diversion dam, dig your main canal and impound your water in the public domain?"

Babson smiled. "I feel assured we can work that game through our local congressman and senator."

"Nathan Tichenor and Lorraine Kershaw," Gagan reminded him smilingly. "They own lands riparian to Eden Valley creek below the proposed diversion dam and may block your aspiration with the Department of Interior by claiming you are diverting water from riparian lands to non-riparian lands, to their signal loss and damage."

TO BE CONTINUED.

# POULTRY

## CLEANING POULTRY HOUSE IS ADVISED

### Building Should Be Freed of Annoying Insects.

By M. D. Farrer, Entomologist, Illinois State Natural History Survey. WNU Service.

Before farmers begin housing their chickens for fall and winter production it will be decidedly profitable to thoroughly clean and treat the poultry buildings for lice, mites and other parasitic insects.

Unless effective control measures are taken at this time, flocks often become so heavily infested with these insect pests that they become unthrifty, egg production declines and thousands of dollars in poultry profits are lost by producers.

Practically all poultry insects can be killed by applications of any kind of oil. This applies particularly to mites, bed bugs and fleas which feed on the birds by sucking their blood at night. In the daytimes these insects usually leave the birds and hide in cracks and crevices in the poultry house.

Some of the more economical and effective oils for this purpose are creosote, kerosene and waste crank case oil, applied with a brush or emulsified with soap and water and sprayed on the inside of the building. Dormant tree spray emulsions mixed at the rate of four or five gallons in 100 gallons of water are also efficient poultry insect destroyers. All corners, cracks and rough places in the wood should be saturated with the oils.

Poultry lice spend their entire lives on the birds and thus must be controlled by treating the fowls with dips, powders or gases toxic to the insects. For this a good grade of sodium fluoride is economical. Each bird is dusted individually by applying a pinch of sodium flouride under each wing and around the vent, roughing the feathers to allow the powder to sift into the plumage, or the birds may be dipped in a solution of one ounce of sodium fluoride in one gallon of water.

Where it is impractical to handle each bird, painting the roosts with 40 per cent nicotine sulphate is recommended. A line of the disinfectant about one-fourth inch wide is applied along the roosts just before the birds retire. The nicotine fumes filter through the birds' feathers, killing the lice. This treatment should be repeated in 10 to 14 days as it does not kill the eggs. All lime or whitewash should be removed from the roosts before the nicotine sulphate is applied.

Scaly leg, caused by mites feeding under the leg scales, can be controlled by dipping the feet and legs in a solution containing two parts of raw linseed oil and one part of kerosene.

## Confined Hens Lay Well, Experiments Have Shown

That hens kept in confinement, if properly fed, will lay quite as well as those of the same age on the usual limited range and even tend to lay eggs larger in size, has been shown in experiments at the United States Animal Husbandry Experiment farm at Beltsville, Md., covering a five-year period.

These experiments further showed that neither the fertility nor the hatchability of the eggs was affected by the confinement of the birds laying them, important considerations in poultry flock economy. There was also no appreciable difference in mortality in the flocks maintained experimentally under the two systems of management.

Both lots of birds were fed the same rations except that those confined to their laying house had cod-liver oil added to the basic ration and the non-confined birds were allowed to range in grass yards about 70 by 100 feet in size. Every effort was made to furnish the confined birds all the sunshine possible through open windows in the laying house, the sunshine and cod-liver oil precautions preventing possible ill effects from vitamin deficiency. Both lots were furnished electric lights from 5 a. m. until daylight each day from September 15 to April 15 each year.

## Types in Cockerels

A great many people when picking out the more desirable cockerels they reserve for breeders make the mistake of taking for first choice those which develop sexually before others of the same age. To those who have not learned by observation that these are apt to be somewhat below average size in their breed, such birds are at this season the most attractive. The cockerels which show the best development at maturity are at this season larger than those just mentioned, and not so well feathered and self-assertive. Until one has learned to recognize the type as that which grows into the best type of adult bird, he is very apt to pass over it, and after he has taken the precocious birds take the largest of those that remain. In a stock of chickens in which the standard weight is the medium, the largest cockerels rarely make desirable breeders. Almost invariably they are coarse and slow to mature.

ASK THE MOTHER who has made this change

The average mother gives any laxative the family may be using, while family doctors give children a *liquid* laxative of suitable ingredients, suitable strength, and in suitable amount.

If you want to know just what a tremendous difference this means to any youngster, just inquire of any mother who has tried it!

She knows that a bilious boy or girl needs a gentle liquid laxative when constipated, *and a little less if dose is repeated* until bowels seem to be moving regularly and thoroughly without need of help.

Use a liquid laxative containing senna (a *natural* laxative). California Syrup of Figs has the right amount for children's use, and this rich, fruity syrup does not harm or upset a child's system.

Get a bottle of the real California Syrup of Figs at any druggist's. All children like its agreeable taste, and it agrees with them. No need to give a child anything stronger. This fruity syrup is laxative enough; indeed, many adults use it in preference to pills and tablets.

THE "LIQUID TEST." First: select a liquid laxative of the proper strength for children. Second: give the dose suited to the child's age. Third: reduce the dose, until the bowels are moving without any help.

An ideal laxative for this purpose is the pure California Syrup of Figs, but be sure the word "California" is on the bottle.

### Grasshopper Control

Insect parasites and fungus diseases are helping control the grasshopper pest in infected regions.

If you tire *easily*—

why not reason out the cause of this unnatural condition?

Your first thought may be, "I must eat more." That's not all. You should enjoy what you do eat. Frequently, the blood cells are low... and this, perhaps, is what makes you feel weak. If this is your trouble the stomach may not be calling for sufficient food. Zest to eat may be lacking. But what a difference S.S.S. makes when taken just before meals. Just try it and notice how your appetite and digestion improve.

S.S.S. stimulates the flow of gastric juices and also supplies the precious mineral elements so necessary in blood-cell and hemo-glo-bin up-building. Do try it. It may be the rainbow you need to brush away present discouragement over your health condition.

Do not be blinded by the efforts of a few unethical dealers who may suggest substitutes. You have a right to insist that S.S.S. be supplied you on request. Its long years of preference is your guarantee of satisfaction.

S.S.S. the world's great blood medicine

### If They Are Evil

Thinking is a habit; at certain times a bad one.

CREOMULSION

Your own druggist is authorized to cheerfully refund your money on the spot if you are not relieved by Creomulsion.

COUGHS

Skin Torment

Itching, roughness, cracking, easily relieved and improved with soothing—

**King Tut's Tomb**

King Tut-Ankh-Amen's burial place was actually composed of four separate rooms. The first, an antechamber, measured about 12 by 24 feet; the second only 12 by 12 feet; the inner tomb or burial chamber 12 by 26 feet; and the final one, about 12 by 15 feet. All the rooms were more than 10 feet in depth.

## How to Serve Pears

CANNED pears are an appetizing product, and all you have to do is to open the can and eat them. But there are lots of other things that you can do with them in a culinary way. You can meringue them, for instance, or serve them in salads, or cocktails, or cobblers. You can make pies of them, or use them in puddings, or make fritters of them, or bake them. In fact, there are dozens of ways of serving this particularly delicious fruit. Here's one of them.

*Meringued Pears*: Drain six canned pear halves (about two-thirds of the contents of a No. 2 can), and lay them in a baking dish about two inches apart. Fill cavities with one tablespoon brown sugar and one tablespoon butter. Beat three egg whites until stiff, add one-half cup confectioner's sugar slowly, and continue beating. Add one teaspoon almond extract, and cover pears completely with this meringue. Bake in a slow—300 degree—oven for fifteen minutes, or until a delicate brown. Serve hot or cold. This serves six and costs only about twenty cents.

**A Fine Fruit Salad**

And here's a way to combine pears and apricots in a fine fruit salad you will find it hard to forget:

Chill eight canned pear halves and sixteen canned apricot halves, and drain thoroughly. In the center of a nest of lettuce place a pear half and flank it with an apricot on each side. Mash three packages cream cheese, soften with a little cream and whip with a fork until fluffy. Drop a spoonful of this in the center of each piece of fruit, and top with a bit of stiff currant jelly. Serve with cream mayonnaise or French dressing. Serves eight.*

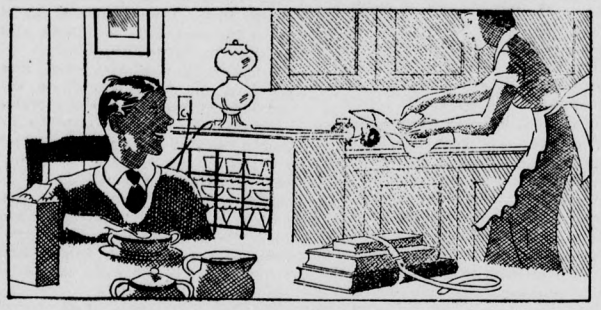
## When the School Lunch Looms



By JOSEPHINE GIBSON
Director, Heinz Food Institute

OCTOBER—AND the school year is already well under way. Each morning brings a quick succession of important tasks. First comes a hearty breakfast—so necessary to start the day well. Then the lunch must be planned to balance nutritionally and packed so attractively it will be eaten down to the last cooky crumb. Of course, packing and carrying limits the food selection, but it is well always to build your menus around this nourishing standard—milk, a hot soup or drink, sandwiches with crisp green vegetables, a simple fruit dessert, and a finishing touch of sweetness in a cooky or a piece of candy. The daily schedule is simplified when the children can come home for lunch. This permits a wider choice of substantial quick dishes, such as nourishing cream soups, oven-baked beans, cooked spaghetti and cooked macaroni from the supply shelf, warm vegetables, green salads and fruits. Such menus as these suggested below will give you new impetus in school lunch plans, be the lunch packed or served at home.

HOME LUNCH

Cream of Tomato or Cream of Celery Soup (ready-to-serve) Crisp Crackers
Snappy Ham and Swiss Sandwich
Lettuce Celery
Fruit Custard* Old Fashioned Brown Sugar Cookies Milk

PACKED LUNCH

Cream of Green Pea Soup (in thermos) Crisp Crackers
Mock Chicken Vegetable Salad Sandwich*
or
Chipped Beef, Cheese and Horseradish Sandwich*

**Fruit Custard**—Scald 1¾ cups milk in double boiler, add 1½ cups cooked rice and ⅓ cup Mince Meat and cook for 5 minutes. Blend 2 tablespoons flour, ½ cup sugar and ¼ teaspoon salt and add to 2 slightly beaten egg yolks. Add ¼ cup milk to this, and stir gradually into the rice and Mince Meat mixture. Continue cooking until thick or the consistency of very thick custard. Remove from fire and add 1 teaspoon vanilla. Pour into casserole or pudding dish and top with meringue made by whipping 2 egg whites until they form a peak, then gradually whipping in 4 tablespoons granulated sugar. Bake in a slow oven (300° F.) for 15 minutes or until delicately brown. Serve cold.

**Mock Chicken Vegetable Salad Sandwich**—Mix thoroughly 1 cup coarsely ground cooked pork or veal, ½ cup finely chopped raw carrot, ½ cup finely chopped celery, 2 tablespoons India Relish, 3 tablespoons Mayonnaise and salt to taste. Spread between slices of white or whole wheat bread, which have been spread with Mayonnaise.

**Chipped Beef, Cheese and Horseradish Sandwich**—Soak ¼ teaspoon Evaporated Horseradish in 1 teaspoon cold water for 10 minutes. Put 1 2½-oz. jar dried beef and ¼ lb. American cheese through food chopper. Add Horseradish and enough Mayonnaise to moisten. Spread 10 thin slices of bread with Mayonnaise. On 5 of them, spread the sandwich filling and top with remaining slices. If served at home, toast lightly, after which lift tops and sprinkle with shredded lettuce. Makes 5 large sandwiches which may be cut in halves.

**Peanut Butter Drop Cookies**—Cream ¼ cup butter with ½ cup Peanut Butter, add ½ cup sugar and continue creaming. Add 2 egg yolks and mix well. Sift 1 cup all-purpose flour, which has been sifted once before measuring, with 2 teaspoons baking powder, and add alternately with ⅓ cup milk. Fold in 2 stiffly beaten egg whites and drop by teaspoonfuls on a well greased baking sheet. Bake on a rack placed rather high in a moderate oven (350° F.) for 10 minutes or until delicately brown.

## Pupils To Raise Funds for Shop Work, Cambrian

A bazaar to which they have invited their parents and friendswill be staged at the school Thursday, Dec. 13, by Cambrian elementary pupils. Proceeds from the affair will be used to convert an old shed on the property into a manual training shop.

The younger pupils are preparing a program for the event, while seventh and eighth graders are manufacturing garden ornaments, etc., which they plan to sell to those attending the bazaar.

Glendon Knowles left last week for the CCC camp in Monterey county. The crew is stationed at the Presidio, and is working on the Big Sur.

Mrs. Fred Weeks, who recently suffered a heart attack, has been confined to her home on South Fourth street.

County workmen Friday painted new street signs on curb corners in Campbell. Black ltetters on a white background were used.

Senator Herbert Jones spoke Sunday night at the Congregational church on the proposed amendments to the state constitution.

George W. Page is convalescing at his home on Winchester road after a second operation recently which kept him a patient at O'Connor's for some time. His daughter, Mrs. Emory Cleaves, who was ready to return to her home in New York state, has remained to be with her parents during this trying time.

**1. *When does ½ Off begin to apply?***
With the bill for electricity used after the December, 1934, meter reading.

**2. *Who gets it?***
All domestic and commercial lighting customers who have been customers at the same location of last year.

**3. *How do I benefit?***
Perhaps you have been using electricity sparingly. Now you can use TWO DOLLARS more of electricity each month than last year and it will only cost ONE DOLLAR.

**4. *Must I add new appliances?***
NO. However, each new electric appliance you install that would normally take EXTRA Electricity at full rate can now operate at half cost.

**5. *How do I apply?***
No action on your part is necessary. The rate automatically applies to all who qualify.

***One-half Off means this: That the amount of money by which your bill for any one month at same location exceeds your bill for the corresponding month a year back will be discounted 50%.***

**6. *How does the rate work?***
Your monthly bill will show that the normal cost for any electricity used in any month in excess of amount used in corresponding month of previous year has been cut in half.

**7. *Can you give an example?***
Say your bill in January, 1934, was $3.00. You install an electric refrigerator, an electric heater and a new lamp. Your January, 1935, bill is $6.00. You have EXTRA Electricity to the amount of $3.00. You get a ½ Off discount of $1.50. The bill you pay in January, 1935, will therefore be only $4.50.

**8. *Does electric equipment installed through a Federal Housing Act loan give me this bargain rate?***
Yes. This rate also applies to the use of additional equipment you install. This should be an extra inducement to you for obtaining a F. H. A loan. See any banker.

**9. *How long will ½ Off be in effect?***
Throughout our system for 12 months ending with the meter reading ending December, 1935.

**10. *Why was this ½ Off rate made?***
To see if a bargain rate would cause a more liberal use of electricity, and take up part of the large power surplus in Northern California.

***IMPORTANT!***
It is hoped and expected by this company that this ½ Off rate will so stimulate use of electricity as to justify a reduction in the regular schedule.
